

# MODERNIZATION AND POLITICAL CHANGE

## The Latin American and Amer-European Nations

ARTHUR S. BANKS

ARTHUR S. BANKS is currently working on a multivariate analysis of cross-national time-series data under a grant from the National Science Foundation. He is Associate Professor of Political Science and Director of the Center for Comparative Political Research of the State University of New York at Binghamton. He is author (with Robert B. Textor) of A Cross-Polity Survey.

A DECADE has now passed since the publication of Seymour M. Lipset's (1969) seminal article, "Some Social Requisites of Democracy." As in the case of most such efforts to chart a new course in behavioral science, the article earned its author both praise and criticism—praise for what he was attempting to do, criticism (both conceptual and methodological) for the manner of its execution (see Cutright, 1963). The present paper reports on research that represents, in part, a return to Lipset's earlier terrain, namely, a comparison between the Latin American and Amer-European nations, as measured by longitudinal indices both political and "developmental" in character. The indicators upon which the present research is based differ, however, from those employed by Lipset. The political indicators were selected with reference to problems of change, rather than of legitimacy, while the remainder (a set of transportation and communications measures) relate to what may be termed technological modernization, rather than to Lipset's "economic development."<sup>1</sup> The principal purpose of the study is to assess the relative homogeneity of (hence the relative "distance" between) the two groups of nations, along the dimensions indicated, for a series of thirteen data points

AUTHOR'S NOTE: Research for this paper has been supported by the National Science Foundation under grant GS-2420.

**Models of Political Change in Latin America** Paul E. Sigmund,1970 Mexico the institutionalization of the revolution Bolivia the failure of hte institutionalization of the revolution Cuba the revolution turns to communism Brazil The military vs the radical left Argentina the military vs peronism Venezuela the victory of constitutional democracy Colombia elite democracy in transformation Chile multiparty politics and democratic reform *Strategic Choice Models of Political Change in Latin America* David Collier,Deborah L. Norden,2016 The article assesses the use of strategic choice models in the study of Latin American politics These models explore how given actors pursue goals by shaping the context in which other actors make choices The discussion centers on Hirschman s analysis of reform mongering Przeworski s threshold model of transitions to democracy and O Donnell s model of democratic consolidation Basic components of the models are examined including the definition of actors preference distributions coalitional thresholds perceptions of the likelihood of given outcomes and efforts to change actual and perceived costs of these outcomes The relationship between such models and more familiar perspectives in the Latin American field is then explored The models have a distinctive emphasis on uncertainty and the creative use of uncertainty by political leaders yet they also have much in common with other research traditions The article advocates eclecticism in employing these alternative analytic approaches Models of Political Change in Latin America Paul Eugene Sigmund (Jr.),Francisco Ignacio Madero,1970 *Models of Political Change in Latin America* , **Models of Political Change in Latin America** Paul E. Sigmund,1970 Mexico the institutionalization of the revolution Bolivia the failure of hte institutionalization of the revolution Cuba the revolution turns to communism Brazil The military vs the radical left Argentina the military vs peronism Venezuela the victory of constitutional democracy Colombia elite democracy in transformation Chile multiparty politics and democratic reform **Strategic Choice Models of Political Change in Latin America** David Collier,Deborah Lee Norden,1991 Models of Religious and Political Change in Latin America Michael Dodson,1974\* *Market Economics and Political Change* Juan D. Lindau,2000-01-01 Does market liberalization promote democracy The accepted answer from scholars pundits and politicians alike has been yes However the contributors to this innovative study of market reforms and political change in Mexico and the People s Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society *Politics And Social Change In Latin America* Howard J. Wiarda,2019-07-11 Since the appearance of the first edition of this text in 1974 the book has stimulated an ongoing debate about the nature of the Latin American development process Although the essays discuss a wide range of historical economic political and social issues they are unified in arguing that the Latin American experience of development is subject to special imperatives of analysis

and interpretation not generally offered in the Western literature on development and social change Arguing that Western models are often inappropriate when applied to Latin America the authors explore alternative approaches to understanding the Latin American pattern of development and change The third edition retains classic essays from earlier editions but has been extensively revised to take account of the dramatic changes in the region over the last ten years Looking particularly at the challenges presented by redemocratization and the new pluralism the book raises the question of whether a distinct tradition still remains New readings discuss the implications of U S foreign policy in Latin America the changing role of the church the process of democratization and human rights issues and speculate on the permanence of Latin America's more pluralistic political structures

**Migrants and Political Change in Latin America** Luis F. Jimenez, 2018-04-23 This book reveals how migrants shape the politics of their countries of origin drawing on research from Mexico Colombia and Ecuador and their diasporas the three largest in Latin America Luis Jimenez discusses the political changes that result when migrants return to their native countries in person and also when they send back new ideas and funds social and economic remittances through transnational networks Using a combination of rich quantitative analysis and eye opening interviews Jimenez finds that migrants have influenced areas such as political participation number of parties electoral competitiveness and presidential election results Interviews with authorities in Mexico reveal that migrants have inspired a demand for increased government accountability Surveys from Colombia show that neighborhoods that have seen high degrees of migration are more likely to participate in local politics and also vote for a wider range of parties at the national level In Ecuador he observes that migration is linked to more competitive local elections as well as less support for representatives whose policies censor the media Jimenez also draws attention to government services that would not exist without the influence of migrants Looking at the demographics of these migrating populations along with the size and density of their social networks Jimenez identifies the circumstances in which other diasporas such as those of South Asian and African countries have the most potential to impact the politics of their homelands

*Democracy in Latin America* Roderic A. Camp, 1996 Events such as the signing of the North American Free Trade Agreement have made it imperative for students to grasp the history and possible directions of Latin American political change This title gives readers both the background and the analytical models necessary for an accurate understanding of this area's political past and future To examine the problems posed by political development Professor Camp has divided this volume into four parts The first section sets the tone with two introductory essays providing an overview of the problems and dilemmas posed by democratization The other three parts explore important aspects of this overall process

**The China Model and Global Political Economy** Ming Wan, 2014-01-10 Since the

beginning of China's phenomenal rise in the international system our knowledge of the country has grown rapidly But those who have debated the China issue in policy circles mostly focus on the implications of China's rise often without a firm understanding of why the country is rising in the first place Using an analytical framework which links China's domestic political economy order and the global system this book helps us to understand China's rise and the China model more clearly Indeed unlike most other works that study the China model as a domestic political economy issue it adopts an explicit international comparative perspective comparing the Chinese model to others such as the Washington Consensus and the Japan model This comparison allows us to break down different components of the China model and to show that while the Chinese Communist Party leadership part of the model is unique other components such as export led growth strategy or packaged aid programs are not By focusing on the root cause of China's rise namely the loop between the evolving China model and an evolving global governance structure this book reveals the degree of compatibility between the country's profit driven domestic political economy system and the post war global economic order and in turn how and why China has been able to rise in the global system The China Model and Global Political Economy makes a key contribution to theories of international relations state development and modernization and as such will appeal to students and scholars of Chinese politics Chinese foreign policy international political economy development studies and international relations
