Multicomponent Chromatography Friedrich G. Helfferich,1990 **Multicomponent Chromatography** Friedrich Helfferich,G. Klein,1970-04-01 Chromatographic science Friedrich Helferich,1970 Multicomponent Chromatography Friedrich G. Helfferich, Gerhard Klein,1970 *Mathematical Modeling and Scale-Up of Liquid Chromatography* Tingyue Gu,2015-04-06

Tingyue Gu's second edition provides a comprehensive set of nonlinear multicomponent liquid chromatography LC models for various forms of LC such as adsorption size exclusion ion exchange reversed phase affinity isocratic gradient elution and axial radial flow LC. Much has advanced since the first edition of this book and the author's software described here is now used for teaching and research in 32 different countries. This book comes together with a complete software package with graphical user interface for personal computers offered free for academic applications. Additionally, this book provides detailed methods for parameter estimation of mass transfer coefficients bed voidage particle porosity and isotherms. The author gives examples of how to use the software for predictions and scale up. In contrast to the first edition, authors do not need to deal with complicated math. Instead, they focus on how to obtain a few parameters for simulation and how to compare simulation results with experimental data. After reading the detailed descriptions in the book, a reader is able to use the simulation software to investigate chromatographic behavior without doing actual experiments. This book is aimed at readers who are interested in learning about LC behaviors and at those who want to scale up LC for preparative and large scale applications. Both academic personnel and industrial practitioners can benefit from the use of the book. This new edition includes new models and software for pellicular cored beads in liquid chromatography. Introduction of user friendly software with graphical user interface. Detailed descriptions on how to use the software. Step by step instructions on parameter estimation for the models. New mass transfer correlations for parameter estimation. Experimental methods for parameter estimation. Several actual examples using the model for product development and scale up. Updated literature review.

Advances in Chromatography J. Calvin Giddings,2021-04-29 This book provides up to date information on a wide range of developments in the general and gas chromatographic methods and applications. It presents timely cutting edge reviews in the fields of bio analytical organic polymer and pharmaceutical chemistry.

Preparative Chromatography H. Schmidt-Traub, Michael Schulte, Andreas Seidel-Morgenstern,2020-02-12 The third edition of this popular work is revised to include the latest developments in this fast changing field. Its interdisciplinary approach elegantly combines the chemistry and engineering to explore the fundamentals and optimization processes involved.

Chemical Engineering Miguel A. Galan, Eva Martin del Valle,2005-10-31 Unlike extensive major reference works or handbooks, *Chemical Engineering Trends and Developments* provides readers with a ready reference to latest techniques in selected areas of chemical engineering where research is and will be focused in the future. These areas are bioseparations, particle science and design, nanotechnology and reaction engineering. The aim of the book is to provide academic and R D researchers

with an overview of the main areas of technical development and how these techniques can be applied Each chapter focuses on a technique plus a selection of applications or examples of where the technique could be applied *Laboratory Handbook of Chromatographic and Allied Methods* Otakar Mikeš,1979 *Guide to Gas Chromatography Literature* Austin V. Signeur,1979-09 The bibliography which follows represents an effort to provide the active or potential worker in the field of gas chromatography with references to the theory methodology and applications of this phase of chemistry A review of the cited references will afford background for proposed applications suggest possible solution of a problem furnish an acquaintance with trends and current work being conducted and furnish a realization of the possibilities and potentialities of a technique for the separation identification and more recently preparation of materials To augment the numerous literature references titles of papers presented at various scientific meetings are given Some of these papers have not been published but they represent a part of the literature of this technique since they indicate the progress and thinking of workers in this field and provide the opportunity for those with mutual interests to communicate with each other for further details To afford ready referral for additional information references are given when available to Chemical Abstracts or to the abstract in the program of the meeting To accommodate those who may desire microfilm or photostatic copies of the published works complete pagination is given rather than initial page references Austin V Signeur CONTENTS Listing of Bibliographie Entries Alphabetized according to first author 1 Author Index 279 **Principles and Practice of Chromatography** B.
