context of rule applying and litigation disputes as well as mediation at the international level and between lawyers and clients. The final part deals with future applications such as computer aided mediation and group decision making with phone modems. The book's combination of decision aiding software, arbitration mediation and super optimum expansionist decision making brings a truly innovative approach to the topic of dispute resolution. This volume should be a welcome addition to academic legal and public libraries and a valuable reference work for lawyers, law students and legal professors and researchers.

Handbook of Public Policy Evaluation Stuart S. Nagel, 2002 This handbook deals with many aspects of public policy evaluation including methods, examples, professionalism, studies, perspectives, concepts, substance, theory, applications, dispute resolution, interdisciplinary interaction.

Handbook of Win-win Policy Analysis: Basic concepts of win-win analysis Stuart S. Nagel, Sarah Eckart, 2001 This monumental handbook is dedicated to the sources of super optimising including Thomas Saaty on multi criteria decision aiding software, Lawrence Susskind on alternative policy dispute resolution and Robert Reich on growth economics which are the fields of management science, law and social science applied here toward building a super optimum win-win society.

Methods, Substances, and Process of Public Policy Stuart S. Nagel, 2002 Devising effective and popular public policy is a daunting task. Often it requires the balancing of diametrically opposed ideas, finding the right mix of liberal, conservative and independent ideas to make a solid compromise. Being able to please all sides in an argument constitutes the theory of win-win solutions. This book examines win-win as one of several means of making policy. Tackling such important issues as democracy, poverty and justice, the book serves as a useful guide to anyone working or interested in the creative field of policy formulation and implementation.

Computer-Aided Decision Analysis Stuart S. Nagel, 1993-06-30 The essence of decision aiding software is that it consists of various forms of microcomputer programming designed to enable users to process a set of 1) goals to be achieved, 2) alternatives available for achieving them and 3) relations between goals and alternatives in order to choose the best alternative combination, allocation or predictive decision rule. Benefits from using decision aiding software include 1) being more explicit about goals to be achieved, alternatives available for achieving them and relations between goals and alternatives, 2) being stimulated to think of more goals, alternatives and relations than one would otherwise be likely to do, 3) being prepared to handle multiple goals, alternatives and relations without getting confused and without feeling the need to resort to a single composite goal or a single go/no-go alternative, 4) being encouraged to experiment with changes in the inputs into one's thinking to see how one's conclusions are affected and 5) being better able

to achieve or exceed one's goals when choosing among alternatives or allocating scarce resources. There are five parts to the book covering 1 a broad overview of decision aiding packages including criteria for evaluating them 2 approaches that are based on management science and operations research including linear programming and decision trees 3 spreadsheet based software generally with goals on the columns alternatives on the rows relations in the cells overall totals for each alternative at the far right and a capability for indicating how the totals would be altered as a result of changes in the inputs 4 expert systems software including rule based and knowledge based expert systems and 5 general applications of decision aiding software and a discussion of the increasing utilization of such software *The Policy Process and Super-optimum Solutions* Stuart S. Nagel, 1994 *Policy Process Super Optimum Solutions* **Controlling Conflict** Edward J. Costello, 1996

Policy Evaluation, 2000 **Section Newsletters** Association of American Law Schools, 1992 **Policy Studies Review**, 1990 Some vols include special issues *The Cumulative Book Index*, 1991 A world list of books in the English language

Environmental Policy Symposium, 1992 **Policy Evaluation** Stuart S. Nagel, 2002 On a high level of generality the question is what constitutes good policy analysis. The key criteria relate to validity, importance, usefulness, originality, and feasibility. This book examines both policy evaluation in general and also presents specific policy problems which shed light on important public policy issues of our times. **Contemporary Policy Evaluation** Stuart S. Nagel, 2002 This book reviews win-win policy, the process itself, ideology, policy software, policy goals, and economic feasibility. The significance of policy evaluation stand out following the events of 11 September 2001. The available evidence points to very weak evaluation based more on partisan motives rather than win-win thinking. *Advances in Social Science and Computers* G. David Garson, Stuart S. Nagel, 1996-02 This annual publication deals with how microcomputers and other computers can be applied to improving the explanatory and evaluative roles of modern social science. Each volume contains chapters by experts in political science, psychology, sociology, economics, and computer science.
