**Dictionary of Disaster Medicine and Humanitarian Relief** S. William A. Gunn, 2012-09-14 The 2nd edition of the Dictionary of Disaster

Medicine and Humanitarian Relief is an essential and practical reference for all those who work in humanitarian relief This new expanded edition presents more than 3000 definitions and acronyms covering the entire multidisciplinary scope of disaster medicine and humanitarian relief as well as new fields such as climate change and bioterrorism As natural disasters humanitarian emergencies and infectious disease epidemics increase in frequency and seriousness this book is an important reference to assist international relief workers communicate with each other and with the media The author has served as both the director of Emergency Humanitarian Operations of the World Health Organization as well as the WHO's chief of scientific terminology As the Director General Emeritus of the World Health Organization says in the Foreword This new expanded edition comes as a timely essential aid against the growing threats of inhuman violence and destructive disasters

**Large-Scale Disasters** Mohamed Gad-el-Hak, 2008-06-23 Extreme events including climatic events such as hurricanes tornadoes drought can cause massive disruption to society including large death tolls and property damage in the billions of dollars Events in recent years have shown the importance of being prepared and that countries need to work together to help alleviate the resulting pain and suffering This volume presents an integrated review of the broad research field of large scale disasters It establishes a common framework for predicting controlling and managing both manmade and natural disasters There is a particular focus on events caused by weather and climate change Other topics include air pollution tsunamis disaster modeling the use of remote sensing and the logistics of disaster management It will appeal to scientists engineers first responders and health care professionals in addition to graduate students and researchers who have an interest in the prediction prevention or mitigation of large scale disasters *The Management of Burns and Fire Disasters: Perspectives* 2000 M. Masellis, S. William A. Gunn, 2012-12-06 This volume is published with a triple aim to take a look back over the advances during the ten years of the Mediterranean Burns Club and mark its anniversary to follow up and strengthen the successful twinning of burns as a clinical individual illness problem and fires as a societal disaster management problem and to look ahead at the perspectives of burn care and fire prevention in the fast approaching new century The occasion also marks the tenth annual presentation of the prestigious G Whitaker International Burns Prize to which the Mediterranean Burns Club acts as the scientific fulcrum The award is now established as the most distinguished recognition in burns science worldwide and it is gratifying that the contributions of many of the renowned recipients will be found in this book This is a sequel to *The Management of Mass Burn Casualties and Fire Disasters* which contained the Proceedings of the First International Conference on Burns and Fire Disasters The book and the conference have fully justified the authors initial concept that burn specialists constantly combatting burn disease and promoting rehabilitation of the victims especially in mass casualty situations had for too long remained separate from that other essential sector the fire fighting authorities and fire prevention systems whose aim is also the protection of the individual and the promotion of safety This long overdue synergism has now become reality and the present volume strengthens this desirable trend Global Perspectives in Health

- Volume II Boutros Pierre Mansourian, 2009-07-20 Global Perspectives in Health is a component of Encyclopedia of Biological Physiological and Health Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Global Perspectives in Health provides the essential aspects and with a myriad of issues of great relevance to our world such as Global Perspectives in Health Determinants of Health and Their Interactions Epidemiology Health and Disease in Populations Health Care Systems Ethical Issues in Health New Problems in Global Health These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

*The Management of Mass Burn Casualties and Fire Disasters* M. Masellis, S. William A. Gunn, 2007-07-23 Thermal harm is one of the most traumatizing assaults on man and his environment Whether suffered by living beings as burn injury or sustained by societal structures as fire damage the resulting physical pain and material loss can be extremely distressing both to the person and to society The health professions and in particular burn specialists have been continually developing effective means of combating burn disease and promoting rehabilitation of the victims especially in mass casualty situations In parallel various levels of the community have been mobilizing fire prevention and fire fighting mechanisms that protect society and the environment from the ever increasing hazards of fire disasters It is therefore surprising that while aiming at the same objective the two sectors have rarely come together doctor has rarely worked with fire chief Yet both disciplines have so much to learn from and contribute to each other's efforts The Mediterranean Burns Club is a professional organization that brings together persons concerned with burn therapy and fire safety in all forms especially in the countries of the Mediterranean basin It is honoured to have been identified by the United Nations as a premier scientific body in its field within the programme of the International Decade for Natural Disaster Reduction It is therefore natural that it should have initiated an international gathering of specialists engaged in burns as a surgical clinical problem and of counterparts dealing with fires as a societal disaster management problem
