context is handled in chapter 2 Call Center Specifics In General It provides a view of technological standards and trends as well as characteristics and requirements regarding the human resources which are the most important ones in call centers Chapter 3 then analyzes the call center CAU relating to the theory and describes detailed its original database in FileMaker Pro 5 0 which my work in San Sebastian was focused on The fourth chapter gives suggestions for optimizing the call center work and enhancing its effectiveness Here I tried to stay within the CAU s sphere of influence Otherwise they weren t very useful and not realizable In chapter 5 it is discussed how to put the proposals into action The database modifications and arised problems during their development are explained Finally their effects on the CAU and its work are stated in the summary of chapter 6
