Screen Genealogies Craig Buckley, Rüdiger Campe, Francesco Casetti, 2025-10-01 Against the grain of the growing literature on screens Screen Genealogies argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display Rather screens continually exceed the optical histories in which they are most commonly inscribed As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens For most of its history a screen was a filter a divide a shelter or a camouflage A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of intersecting and competing definitions of the screen enabling new thinking about what the screen might yet become
