Multinational Culture Social Impacts Of A Global Economy:

Multinational Culture Cheryl R. Lehman, Russell M. Moore, 1992-11-24 The papers collected here were originally presented at a conference on multinational culture held at Hofstra University to explore the sociocultural impacts of the transformation to a global economy. Written by a distinguished group of contributors from Africa, Asia, Europe, Latin America, the Caribbean, and North America, the essays address such questions as: Which particular changes have already taken root? How can we assess the efficacy of interventions by nation states and transnational authorities? How are the globe's resources being managed and how should they be managed in the future? Specific topics explored include government policies and their relationship to multinational activities, the formation and regulation of international capital labor market segmentation and protectionism, managing multinationals without sacrificing ethical standards or profits, environmental impacts and the language, legal, gender and race dimensions of a global economy. Following a general introduction, the volume is divided into six groups of chapters, each of which examines a specific aspect of global transition. The contributors first look at the more general issues of global movements and global policies, with articles on critical social movements and the future of the global political economy, the evolution of multinational public policy towards business and the implications of internationalization for development and welfare in the Third World. The next section describes globalization's reach into the arenas of monetary policy, banking, financing and debt. Subsequent chapters look at the explicit and implicit prejudices and differences that can undermine or enhance our global experience, present case studies of the contradictory imperatives between indigenous culture and globalization, affirm the importance of collective action in protecting labor and the environment, and consider the controversial and multifaceted nature of technology transfer. The diversity of topics and perspectives presented make this an ideal set of supplemental readings for advanced level courses in development economics, political economy and international economics.

The EU, the WTO and China Francis Snyder, 2010-09-02 This book presents a new theoretical framework for understanding the regulation of international trade. For this purpose it analyses a series of integrated studies of relations between the EU, the WTO and China. It consists of three main parts. Part I introduces the basic concepts. It surveys the literature on law and globalisation, introduces the concept of sites of governance and the theory of global legal pluralism, and sketches the foundations of global legal pluralism. It shows that each site of governance has both a structural dimension, consisting of institutions, norms and dispute resolution processes, and a relational dimension comprising its relations with other sites of governance. The totality of sites of governance constitutes a new form of global legal pluralism. Part II analyses global legal pluralism in action in relations between the EU, the WTO and China. It examines the construction of relations between sites, ways in which relations between sites give rise to new legal concepts or transform the character of rules, the tension between regionalism and international integration and the governance of international production networks. It emphasises the reciprocal interaction between the structural features and the relational features of sites. Part III explores

new directions in global legal pluralism It first analyses regional trade agreements as a way of creating new sites of governance focusing on agreements involving China Then it considers how to enhance ethical values in international trade regulation Based on an institutional analysis of relations between the WTO and other sites of governance it proposes ways in which global legal pluralism can be used to reform the WTO today the predominant institution in the regulation of international trade including trade between the EU and China [Contemporary South Africa and the Political Economy of Regional Development](#) Methembe Mdlalose,Isaac Khambule,Nene Ernest Khalema,2025-02-21 South Africa s struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid As such understanding the complexities of the global economy and of South Africa s place in it is of great importance This book builds upon an existing body of literature which has demonstrated that while the post apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state s apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners

Globalization, Growth and Sustainability Satya Dev Gupta,2012-12-06 Globalization Growth and Sustainability focuses on the implications of both regional and global trade liberalization and complementary macroeconomics policy reforms on growth equity and sustainability The volume is organized into three sections Part One addresses the issue of economic growth with a special reference to less developed economies Part Two examines the pros and cons of the regional economic integration movement for the countries either participating in or outside of the regional groups Part Three focuses on the issues of equity and sustainability Globalization Growth and Sustainability will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula including economics development studies and international studies [The Economy in the Reagan Years](#) Anthony S. Campagna,1994-01-05 The arguments over the economic policies of the Reagan Administration will continue until sufficient time has elapsed for a consensus to be possible In the meantime it is necessary for contemporary scholars to record their

opinions as a base for the consensus Campagna has recorded his conclusions based on considerable research on Reagan Administration policies He begins by describing what was planned by the government From there he discusses what actually happened and devotes the remainder of the work to his opinion of what has been left with which the future must deal Campagna concludes that the Reagan economic policies failed He establishes a position for others to attack or defend in their own publications in the continuing argument

Ethical Models and Applications of Globalization: Cultural, Socio-Political and Economic Perspectives Wankel, Charles,2011-11-30 Continued growth of the global market necessitates research that establishes norms and practices and ensures the appropriate level of ethical concern for those who contribute to the process of globalization and are being affected by globalization Ethical Models and Applications of Globalization Cultural Socio Political and Economic Perspectives presents the work of researchers who seek to advance the understanding of both the ethical impact of globalization and the influence of globalization on ethical practices from various cultural socio political economic and religious perspectives The aim of this reference work is to put forward empirically grounded methods for understanding both the effect that the process of globalization has on ethical practices in organizations and how this research can shape the course of economic globalization
