Using Multi-Criteria Decision Analysis in Natural Resource Management Tony Prato,2017-03-02 Providing useful insights on the use of Multi Criteria Decision Analysis MCDA in natural resource management this book examines a number of empirical applications for several countries and a variety of natural resources It is shown that using MCDA in the management of water forestry wetland and other natural resources can substantially improve the design and implementation of natural resource and environmental policies Stakeholder involvement is also an important determinant of successful resource management and MCDA provides a useful and effective framework for getting stakeholders involved in resource management decisions Using Multi Criteria Decision Analysis in Natural Resource Management gives in depth analysis of the potential problems in applying these techniques including difficulties eliciting required information lack of suitable measures for environmental variables and the need to develop innovative methods to simplify the use of MCDA

Value Functions for Environmental Management E. Beinat,2013-04-18 Environmental decisions must satisfy a multitude of objectives and the matching of a plan

policy or project to such objectives is a matter of both facts and value judgements Value Functions for Environmental Management provides a systematic approach to the structuring and measurement of value judgements showing how they drive the decision process and how to make them transparent and effective in support of complex decisions The value functions that the book describes provide a scheme for the exploration of human values and a tool for transforming them into an analytical model A clear statement can then be made of the degree to which a decision has achieved its objectives and how conflicting objectives may be addressed This does not mean that there is no role for human judgement in the process Complexity often coupled with large information gaps necessitates expert judgement but the values adopted by the experts are themselves capable of being structured and measured according to the value function methodology presented here even if the judgements themselves are qualitative and tentative Value models for expert panels are also presented The use of the methodology in practice is illustrated by examples The book contains an extensive subject index *Multiple Objective Decision Making For Land, Water, and Environmental Management* Samir A.
