Multiplicative Galois Module Structure:

Multiplicative Galois Module Structure A. Weiss, This text is the result of a short course on the Galois structure of S units that was given at The Fields Institute in the autumn of 1993 Offering a new angle on an old problem the main theme is that this structure should be determined by class field theory in its cohomological form and by the behaviour of Artin L functions at $s = 0$ A proof of this or even a precise formulation is still far away but the available evidence all points in this direction The work brings together the current evidence that the Galois structure of S units can be described This is intended for graduate students and research mathematicians specifically algebraic number theorists *Multiplicative Galois Module Structure* A. Weiss, 2012

Class Group Relations and Galois Module Structure Bart De Smit, 1993 *Algebra and Number Theory* Gerhard Frey, Jürgen Ritter, 2011-04-20 The series is aimed specifically at publishing peer reviewed reviews and contributions presented at workshops and conferences Each volume is associated with a particular conference symposium or workshop These events cover various topics within pure and applied mathematics and provide up to date coverage of new developments methods and applications *Canadian Journal of Mathematics*, 1994-04

L-Functions and Arithmetic J. Coates, Martin J. Taylor, 1991-02-22 Aimed at presenting nontechnical explanations all the essays in this collection of papers from the 1989 LMS Durham Symposium on L functions are the contributions of renowned algebraic number theory specialists *The Second Chinburg Conjecture for Quaternion Fields* Jeff Hooper, Victor Percy Snaith, Minh Van Tran, 2000 The Second Chinburg Conjecture relates the Galois module structure of rings of integers in number fields to the values of the Artin root number on the symplectic representations of the Galois group This book establishes the Second Chinburg Conjecture for various quaternion fields *Factorisability, Group Lattices, and Galois Module Structure* David John Burns, 1989

Elementary and Analytic Theory of Algebraic Numbers Władysław Narkiewicz, 2004-06-24 This book details the classical part of the theory of algebraic number theory excluding class field theory and its consequences Coverage includes ideal theory in rings of algebraic integers p adic fields and their finite extensions ideles and adeles zeta functions distribution of prime ideals Abelian fields the class number of quadratic fields and factorization problems The book also features exercises and a list of open problems
