Munch Revisited:

Munch Revisited Edvard Munch, Per Hovdenakk, Kathrine Ringnes, 2005 *Munch Revisited* Rosemarie E. Pahlke, 2005
In her penetrating new study *Na ama Rokem* observes that prose writing more than poetry drama or other genres came to signify a historic rift that resulted in loss and disenchantment. In *Prosaic Conditions* Rokem treats prose as a signifying practice that is a practice that creates meaning. During the nineteenth and twentieth centuries prose emerges in competition with other existing practices specifically the practice of performance. Using Zionist literature as a test case Rokem examines the ways in which Zionist authors put prose to use both as a concept and as a literary mode. Writing prose enables these authors to grapple with historical political and spatial transformations and to understand the interrelatedness of all of these changes.

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices. Looking at avant garde figures such as Maurice Denis, douard Vuillard, August Strindberg and Edvard Munch, Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes. She shows how the concept of nature's experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists' solutions to the problem of symbolist form and provided a ready made methodology for fin de siècle truth seekers. By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation, automatism, the arabesque and madness to create modern works that were radically and usefully strange. Focusing on the scientific, psychological and experimental tactics of symbolism, *Nature's Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism.

Art about AIDS
Sophie Junge, 2016-11-21 In addition to being a medical, political and social crisis the AIDS epidemic in the United States also led to a crisis of artistic representation. This book reveals the important political and moral role of American photographers in the social discourse on AIDS based on the 1989 New York exhibition *Witnesses Against Our Vanishing* curated by photographer Nan Goldin.

Blacks and Blackness in European Art of the Long Nineteenth Century Adrienne L. Childs, 2017-07-05 Compelling and troubling colorful and dark black figures served as the quintessential image of difference in nineteenth century European art. The essays in this volume further the investigation of constructions of blackness during this period. This collection marks a phase in the scholarship on images of blacks that moves beyond undifferentiated binaries like negative and positive that fail to reveal complexities, contradictions and ambiguities. Essays that cover the late eighteenth through the early twentieth century explore the visuality of blackness in anti-slavery imagery, black women in Orientalist art.
