Mundo Perdido:

El Mundo Perdido ,2005 The Maya and Teotihuacan Geoffrey E. Braswell,2009-07-21 The contributors to this volume present extensive new evidence from archaeology iconography and epigraphy to offer a more nuanced understanding of the interaction between the Early Classic Maya and Teotihuacan Winner Choice Outstanding Academic Book 2005 Since the 1930s archaeologists have uncovered startling evidence of interaction between the Early Classic Maya and the great empire of Teotihuacan in Central Mexico Yet the exact nature of the relationship between these two ancient Mesoamerican civilizations remains to be fully deciphered Many scholars have assumed that Teotihuacan colonized the Maya region and dominated the political or economic systems of certain key centers perhaps even giving rise to state level political organizations Others argue that Early Classic rulers merely traded with Teotihuacan and skillfully manipulated its imported exotic goods and symbol sets to increase their prestige Moving beyond these traditional assumptions the contributors to this volume present extensive new evidence from archaeology iconography and epigraphy to offer a more nuanced understanding of the interaction between the Early Classic Maya and Teotihuacan Investigating a range of Maya sites including Kaminaljuyu Cop n Tikal Altun Ha and Oxkintok they demonstrate that the influence of Teotihuacan on the Maya varied in nature and duration from site to site requiring a range of models to explain the patterns of interaction Moreover they show that the interaction was bidirectional and discuss how the Maya in turn influenced Teotihuacan

Water Politics and Spiritual Ecology Lisa Palmer,2015-05-15 As water resources diminish with increasing population and economic pressures as well as global climate change this book addresses a subject of ever increasing local and global importance In many areas water is not only a vital resource but is also endowed with an agency and power that connects people spirit beings place and space The culmination of a decade of ethnographic research in Timor Leste this book gives a critical account of the complex social and ecological specificities of a water focused society in one of

the world's newest nations. Comparatively framed by international examples from Asia, South America and Africa that reveal the need to incorporate and foreground cultural diversity in water governance, it provides deep insight into the global challenge of combining customary and modern water governance regimes. In doing so, it addresses a need for sustained critical ecological inquiry into the social issues of water governance. Focusing on the eastern region of Timor Leste, the book explores local uses, beliefs and rituals associated with water. It identifies the ritual ecological practices, contexts and scales through which the use, negotiation over and sharing of water occurs and its influence on the entire sociocultural system. Building on these findings, the book proposes effective conceptual and methodological tools for advancing community engagement and draws out lessons for more integrated and sustainable water governance approaches that can be applied elsewhere. This book will be of great interest to students and researchers in environmental studies, environmental policy and governance.
