Mujeres Sin Sombra Maternidad Y Tecnologia:

Mujeres sin sombra Silvia Tubert, 1991 El vertiginoso desarrollo de las tecnologías reproductivas que afecta a cuestiones tan esenciales como la reproducción la maternidad la paternidad en suma la transmisión de la herencia biológica y cultural de la humanidad y la constitución del sujeto psíquico exige que nos detengamos a reflexionar sobre sus condiciones de posibilidad y sus implicaciones Este libro nos proporciona información sobre una cuestión que apenas ha sido estudiada en España y que los medios de difusión han contribuido a distorsionar debido a su carácter propagandístico Se trata de un análisis tan riguroso como situado a las tecnologías reproductivas en el contexto histórico de la tecnologización de la gestión de la vida y del discurso social y médico sobre la maternidad y la esterilidad articulándolo con la dimensión subjetiva del deseo La circulación de representaciones entre el imaginario individual y los mitos colectivos es el fundamento de un enfoque complejo y original que conjuga una diversidad de discursos heterogéneos que proceden del psicoanálisis la antropología la mitología y la literatura

Eulalia Pérez-Sedeño, Lola S. Almendros, S. García Dauder, Esther (Mayoko) Ortega Arjonilla, 2019-03-27 Science Technology and Gender studies STG include the different approaches to feminist epistemologies their current debates and also the theoretical analysis of different scientific controversies around cases that involve women's bodies and health sex gender and techno scientific practices These studies are linked to the demand for another type of hybrid knowledge that revalorizes the practices the embodied experience and care as well as the subject positions traditionally excluded from the scientific community The diversity of voices has allowed a plural knowledge in techno scientific practices to emerge as well as the identification of gender class sexuality race functional diversity inequalities for example This has made possible a bioethical reflection which is not understood as abstract normative principles but linked to the practices and lived experience Divided into three parts this edited volume presents original and insightful research on STG from feminist epistemologies The first part addresses fundamental theoretical questions that feminist epistemologies raise and how they confront complex social problems such as gender based violence The second part deals with research practices or processes explicitly showing the relationship between science and policy Finally the third part presents some case studies that show the multidimensionality of the problems and the depth and richness of these analyses The contributions included in the volume present original and in depth research on local case studies within Spain Not only challenging the hegemonic and global perspectives on different issues this volume also opens up and enables discussion of these global narratives This edited volume is a useful tool for researchers and university students in multiple fields such as gender studies feminist epistemologies STS cultural history or transgender studies **Narrating Motherhood(s), Breaking the Silence** Silvia Caporale-Bizzini, 2006 Feminist theory on motherhood has successfully transformed mothers into subjects of their own discourse recognized the historical heterogeneous and socially constructed origins of their life experience while at the same time widening our understanding of the notion of mothering This collection combines a literary and a wider cultural perspective from which to look at the topic of the representation of other or forgotten motherhoods Mothers who have been forced to live exiled and away from their children women who after trying to conceive get pregnant but discover they cannot bear to become mothers or even literary characters based on an autobiographical experience of a sexually abusive mother The essays critically point out how writing becomes a tool to think and write about the many aspects of motherhood such as an idealized maternal experience versus the real one or the accepted stereotypes of the good mother and the bad mother *Del sexo al género* Silvia Tubert, Geneviève Fraisse, 2003 Reflexiones críticas sobre el concepto de género formuladas desde la perspectiva de diversas disciplinas que se han valido de l Cartografías del cuerpo Eulalia Pérez Sedeño, Esther Ortega Arjonilla, 2014-05-08 El cuerpo ha sido considerado tradicionalmente por los estudios sociales y filosóficos como un mero recipiente o como un objeto que pertenece a m s bien al orden de lo biológico Sin embargo en las últimas décadas el feminismo los estudios CTS y otros movimientos
