**Handbook of Multicriteria Analysis** Constantin Zopounidis, Panos M. Pardalos, 2010-05-25 Multicriteria analysis is a rapidly growing aspect of operations research and management science with numerous practical applications in a wide range of fields. This book presents all the recent advances in multicriteria analysis including multicriteria optimization, goal programming, outranking methods, and disaggregation techniques. The latest developments on robustness analysis, preference elicitation, and decision making when faced with incomplete information are also discussed together with applications in business performance evaluation, finance, and marketing. Finally, the interactions of multicriteria analysis with other disciplines are also explored, including among others data mining, artificial intelligence, and evolutionary methods.

**Multiple Criteria Decision Analysis: State of the Art Surveys** Salvatore Greco, 2006-01-20 Multiple Criteria Decision Analysis: State of the Art Surveys provides survey articles and references of the seminal or state of the art research on MCDA. The material covered ranges from the foundations of MCDA over various MCDA methodologies, outranking methods, multiattribute utility and value theories, non-classical approaches to multiobjective mathematical programming, MCDA applications, and software.
