*A Geography of Heritage* Brian Graham, Greg Ashworth, John Tunbridge, 2016-04-29 The concept of heritage relates to the ways in which contemporary society uses the past as a social, political or economic resource. However, heritage is open to interpretation and its value may be perceived from differing perspectives, often reflecting divisions in society. Moreover, the schism between the cultural and economic uses of heritage also gives rise to potential conflicts of interest. Examining these issues in depth, this book is the first sustained attempt to integrate the study of heritage into contemporary human geography. It is structured around three themes: the diversity of use and consumption of heritage as a multi-scaled cultural and economic resource; the conflicts and tensions arising from this multiplicity of uses; producers and consumers; and the relationship between heritage and identity at a variety of scales.

**Multicultural Teaching in the University** David L. Schoem, 1993-01-26

This important new book for college teachers, administrators, trainers, workshop leaders and prospective secondary school teachers, challenges of teaching in institutions and classrooms that are increasingly diverse. The volume's introductory chapter, which discusses the meaning of multicultural teaching, is followed by more than twenty essays by faculty from different disciplines, each articulating the multiple dimensions and components of multicultural teaching. They discuss their own teaching and classes in terms of course content, process and discourse, and diversity among faculty and students in the classroom. The book concludes with a roundtable discussion by the authors about the meaning of multicultural teaching, a section on responses to questions about conflict in the classroom, and a list of exercises for classroom and workshop use. Rather than representing a homogeneous view of multicultural teaching, this volume reflects the debate and dialogue that surround the issue. While colleges and their faculty are searching to adapt their teaching to the rapidly changing demographics on campus, there are very few models for teachers. *Multicultural Teaching in the University* integrates new scholarship that reflects a more expansive notion of knowledge and suggests new ways to communicate with diverse populations of students.

### **Multiculturalism in a**

**Cross-National Perspective** Michael A. Burayidi, 1997-03-20 This book provides a discussion of multiculturalism from a global perspective. It progresses from a discussion of the ideological and philosophical arguments for multiculturalism through its political, public policy and socio-economic dimensions. Multicultural practices from Canada, Germany, India, Israel, Nigeria, Rwanda, the United Kingdom and the United States are discussed. The response to multiculturalism differs from one country to the other and is influenced by the political context, rules of immigration, colonial legacy, domestic institutional structures and pressure from interest groups. Because multiculturalism is a contentious issue as groups vie for limited resources, the debate on multiculturalism will be a heated one. Governments can facilitate the process by creating an environment that enables the exchange of ideas without conflict and antagonism
