## Assignment Summary

In this assignment, you will research an element of your choice from the periodic table. Using reference materials and Internet sites, you will collect information about the element. Useful references for gathering this information are listed at the end of this document. You will then present your findings in a multimedia presentation, which should include seven slides: a title slide, a slide containing periodic table information, a slide containing physical and chemical properties of the element, a slide containing information on the discovery of the element, a slide containing information about the location of the element and how it is obtained, a slide containing uses of the element, and a works cited slide.

## Assignment Instructions

**Step 1: Gather materials and necessary information.**

a) You will collect the following information about your element:

☐ Periodic table information including type of element, atomic number, atomic mass, number of protons, number of electrons, number of neutrons, period number, group number, and group name

☐ Physical and chemical properties of the element

☐ When, where, and by whom the element was discovered

☐ Where the element is found and how it is obtained

☐ Uses for the element and/or products made from the element

☐ Images of the element

b) Be sure to keep a list of your references so you can cite them later.

c) Ask your teacher where you should save your presentation as you work on it. Your teacher may also have specific guidelines about the file name you should use.

**Step 2: Create your title slide.**

a) Begin by creating the title slide. On this slide, include the symbol of the element in large font, the name of the element, an image of the element, your name, your teacher's name, and the due date of the presentation.

b) Remember to save your work as you go.

**Step 3: Identify periodic table information.**

a) Create a slide titled **Periodic Table Information**.

b) On the slide, add this information about the element:

☐ Type of element (i.e., metal, nonmetal, metalloid)

☐ Atomic number

☐ Atomic mass

☐ Number of protons, number of electrons, and number of neutrons

☐ Period number

☐ Group number

☐ Name of group to which it belongs (i.e., alkali metals, alkaline earth metals, halogens, noble gases, and so on)
