Electrocatalysis Richard C. Alkire, Dieter M. Kolb, Jacek Lipkowski, 2013-12-16 Catalysts speed up a chemical reaction or allow for reactions to take place that would not otherwise occur The chemical nature of a catalyst and its structure are crucial for interactions with reaction intermediates An electrocatalyst is used in an electrochemical reaction for example in a fuel cell to produce electricity In this case reaction rates are also dependent on the electrode potential and the structure of the electrical double layer This work provides a valuable overview of this rapidly developing field by focusing on the aspects that drive the research of today and tomorrow Key topics are discussed by leading experts making this book a must have for many scientists of the field with backgrounds in different disciplines including chemistry physics biochemistry engineering as well as surface and materials science This book is volume XIV in the series Advances in Electrochemical Sciences and Engineering
