Multivariate Analysis for the Behavioral Sciences Second Edition is designed to show how a variety of statistical methods can be used to analyse data collected by psychologists and other behavioral scientists Assuming some familiarity with introductory statistics the book begins by briefly describing a variety of study designs used in the behavioral sciences and the concept of models for data analysis The contentious issues of p values and confidence intervals are also discussed in the introductory chapter After describing graphical methods the book covers regression methods including simple linear regression multiple regression locally weighted regression generalized linear models logistic regression and survival analysis There are further chapters covering longitudinal data and missing values before the last seven chapters deal with multivariate analysis including principal components analysis factor analysis multidimensional scaling correspondence analysis and cluster analysis Features Presents an accessible introduction to multivariate analysis for behavioral scientists Contains a large number of real data sets including cognitive behavioral therapy crime rates and drug usage Includes nearly 100 exercises for course use or self study Supplemented by a GitHub repository with all datasets and R code for the examples and exercises Theoretical details are separated from the main body of the text Suitable for anyone working in the behavioral sciences with a basic grasp of statistics Multivariable Modeling and Multivariate Analysis for the Behavioral Sciences Brian S. Everitt, 2009-09-28

Multivariable Modeling and Multivariate Analysis for the Behavioral Sciences shows students how to apply statistical methods to behavioral science data in a sensible manner Assuming some familiarity with introductory statistics the book analyzes a host of real world data to provide useful answers to real life issues The author begins by exploring **The Scientific Use of Factor Analysis in Behavioral and Life Sciences** Raymond Cattell, 2012-12-06
