There are many books and computer programs dealing with data analysis. It would be easy to count at least a manual of recent views that evolved in the study of vegetation. Today in the face of environmental acquisitions which we believe significantly affect the degradation caused by anthropogenic pressures on the future of vegetation analysis biosphere there is added urgency to study vegetation. 1 Vegetation is a fuzzy system it must be treated as processes and dynamics in order to understand their role such as at the set level where the idea of conceptualized in regulating the water oxygen and the carbon cycles in patterns must drive the research design relation to global warming and ozone layer depletion. It 2 Vegetation cannot be seen only in the perspective of a is well known that ecology was developed first in vegetation traditional taxonomy based on the species concept. tion studies see Acot 1989 but after an active period character sets of ecological value must enter into marked by intensive phytoclimatic and synecological consideration and a hierarchical analysis of patterns studies vegetation science entered in a rather dormant and processes should be the basis of comparisons period.
