political ideology and history of the Labour Party's world view and foreign policy. It argues that the development of Labour's foreign policy perspective should be seen not as the development of a socialist foreign policy but as an application of the ideas of liberal internationalism. The first volume outlines and assesses the early development and evolution of Labour's world view. It then follows the course of the Labour party's foreign policy during a tumultuous period on the international stage including the First World War, the Russian Revolution, the Spanish Civil War, the build up to and violent reality of the Second World War and the start of the Cold War. This highly readable book provides an excellent analysis of Labour's foreign policy during the period in which Labour experienced power for the first time. **Systematics and Taxonomy of Australian Birds** Les Christidis, Walter E Boles, 2008-01-25. *Systematics and Taxonomy of Australian Birds* presents an up to date classification of Australian birds. Building on the authors 1994 book *The Taxonomy and Species of Birds of Australia and its Territories* it incorporates the extensive volume of relevant systematic work since then. The findings of these studies are summarised and evaluated in the explanations for the taxonomic treatments adopted and with the extensive citations the book serves as a comprehensive introduction to the recent systematic literature of Australian birds. All species of birds that have been recorded from the Australian mainland, Tasmania, island territories and surrounding waters are treated and listed. Along with extant native species all accepted vagrants, recently extinct since 1800, native species and established introduced species are included.
