Non-homogeneous Random Walks Mikhail Menshikov, Serguei Popov, Andrew Wade, 2016-12-22 Stochastic systems provide powerful abstract models for a variety of important real life applications for example power supply traffic flow data transmission They and the real systems they model are often subject to phase transitions behaving in one way when a parameter is below a certain critical value then switching behaviour as soon as that critical value is reached In a real system we do not necessarily have control over all the parameter values so it is important to know how to find critical points and to understand system behaviour near these points This book is a modern presentation of the semimartingale or Lyapunov function method applied to near critical stochastic systems exemplified by non homogeneous random walks Applications treat near critical stochastic systems and range across modern probability theory from stochastic billiards models to interacting particle systems Spatially non homogeneous random walks are explored in depth as they provide prototypical near critical systems

**Sleep-walking and Hypnotism** Daniel

Hack Tuke,1884 *Walking Shadows* Ib Johansen,2015-08-25 Walking Shadows focuses on the American fantastic and the American grotesque attempting in this manner for the first time to establish an overview of and a theoretical approach to two literary modes that have often been regarded as essential to an understanding of the American cultural canon The central importance of these two literary forms has been pointed out earlier by important theorists such as Stanley Cavell David Reynolds and William Van O Connor A number of literary works from the beginning of the nineteenth to the end of the twentieth centuries are taken up in order to illustrate the inherent links or family resemblances between the two modes with special reference to the way in which a Bakhtinian reading may facilitate our appreciation of their status within the canon These excursions into the House of Fantastic and Grotesque Fiction may be of interest not only to hardcore aficionados but also to philosophically minded readers in general in particular perhaps to those who have paid acute attention to debates on late twentieth and early twenty first century post structuralism and deconstruction where the classic positions of Foucault Derrida et al still appear to be relevant
