News Audiences And Everyday Life:

The Audience in Everyday Life S. Elizabeth Bird, 2013-08-21 The Audience in Everyday Life argues that a media audience cannot be studied in front of the television alone their interaction with media does not simply end when the set is turned off Instead we must study the daily lives of audiences to find the undercurrents of media influence in everyday life Bird provides a host of useful tools and methods for scholars and students interested in the ways media is consumed in everyday life The Places and Spaces of News Audiences Chris Peters, 2018-04-19 Historically or so we would like to believe the story of everyday life for many people included regular definitive moments of news consumption Journalism in fact was distributed around these routines papers were delivered before breakfast the evening news on TV buttressed the transition from dinner to prime time programming and radio updates were centred around commuting patterns These habits were organized not just around specific times but occurred in specific places following a predictable pattern However the past few decades have witnessed tremendous changes in the ways we can consume journalism and engage with information from tablets to smartphones online and so forth and the different places and moments of news consumption have multiplied as a result to the point where news is increasingly mobile and instantaneous It is personalized localized and available on demand Day by day month by month year by year technology moves forward impacting more than just the ways in which we get news These fundamental shifts change what news is This book expands our understanding of contemporary news audiences and explores how the different places and spaces of news consumption change both our experiences of journalism and the roles it plays in our everyday lives This book was originally published as a special issue of Journalism Studies
