Newtons Sleep Two Cultures And Two Kingdoms:

Science Fiction and the Two Cultures Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback's ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners

Newton's Sleep R. Tallis, 1995-09-27 Vast in its intellectual scope it should induce not so much sleep as controversy whether literary or scientific philosophical or political It skims the oceans of academe in a manner accessible to the educated public informed and cogently argued stylistically dense Sandra Goldbeck Wood British Medical Journal Tallis can and frequently does write extremely well He also writes with considerable passion Raymond Tallis is perhaps best seen as an exceptionally interesting and broad minded heir to Huxley preaching the cause of the Church Scientific Richard Webster Times Literary Supplement Reviews of Not Saussure and The Explicit Animal Not Saussure I greatly enjoyed it Bernard Bergonzi The Explicit Animal his books are genuine contributions to professional debate Stephen R L Clarke Times Literary Supplement Newton's Sleep examines the complementary roles of science and art in human life Science has been criticised for being at best useful but spiritually derelict and art for attempting to answer the spiritual needs of humankind while ignoring the material needs of millions who live in want Newton's Sleep deals with the charges that science is spiritually empty and that art fails in its civilising mission by relating these aspects of human culture to the physical and metaphysical hungers of an explicit animal who lives in both the Kingdom of Means and the Kingdom of Ends Tallis can and frequently does write extremely well He also writes with considerable passion Tallis is perhaps best seen as an exceptionally interesting and broad minded heir to Huxley preaching the cause of the Church Scientific Richard Webster

From Two Cultures to No Culture Frank Furedi, 2009 In 1959 C P Snow delivered the annual Rede Lecture in Cambridge under the title of *The Two Cultures and the Scientific Revolution* Snow warned of a gap that had opened up between scientists and the literary intellectuals that made it almost impossible for the two groups to communicate Snow complained that literary intellectuals were not only ignorant of science but contemptuous of it as if scientific knowledge were unnecessary for a good education Snow believed that improvements in the teaching of science were required in order to address the world's greatest problems and that both the USA and the USSR were ahead of Britain in that respect Snow spoke with the authority of a man with a foot in both camps as a trained research scientist and a successful novelist and his lecture provoked worldwide coverage

The Kingdom of Infinite Space Raymond Tallis, 2014-05-14 In this pathbreaking book one of Britain's most eloquent and original thinkers writes about the head what happens in it and how it is and is not connected to our sense of identity and consciousness Blending science philosophy and humor Raymond Tallis examines the extraordinarily complex relationship we have with our heads His aim as he says is to turn readers into astonished tourists of the piece of the world that is closest to them so they never again take for granted the head that looks at them from the mirror Readers will delight that this is precisely what he accomplishes The voyage begins with a meditation on the self portrait of a mirror image followed by a consideration of the head's various secretions Tallis contemplates the air we exhale the subtle meanings of nods winks and smiles the mysteries of hearing taste and smell He discusses the metaphysics of the gaze the meaning of kissing and the processes by which the head comes to understand the world Along the way he offers intriguing digressions on such notions as having and using one's head and enjoying and suffering it Tallis concludes with his thoughts on the very thing the reader's head has been doing throughout the book thinking
