Nexus Analysis Discourse And The Emerging Internet:

Nexus Analysis Ronald Scollon, Suzanne B. K. Scollon, 2004 Review Using as a study their own experience of pioneering computer mediated communication in Alaska in the late 1970s and early 1980s the authors conduct a nexus analysis of those events and discourses As email and audio video conferencing technologies expanded the possibilities for education and social interaction the authors played an active role in shaping and analyzing their use Looking back on that early formative period and assessing its impact on the present world the authors evaluate moments of social importance in order to examine the linkages among social practices Alaskan peoples and technologies They consider the power of communication media to cause and ramify change **BOOK JACKET** **Nexus Analysis** Suzie Wong Scollon, 2004-07-31 Nexus Analysis presents an exciting theory by two of the leading names in discourse analysis and provides a practical guide to its application The authors argue that discourse analysis can itself be a form of social action If the discourse analyst is part of the nexus of practice under study then the analysis can itself transform that nexus of practice Focussing on their own involvement with and analysis of pioneering communication technologies in Alaska they identify moments of social importance in order to examine the links between social practice culture and technology Media are identified not only as means of expressing change but also as catalysts for change itself with the power to transform the socio cultural landscape In this intellectually exciting yet accessible book Ron Scollon and Suzie Wong Scollon present a working example of their theory in action and provide a personal snapshot of a key moment in the history of communication technology as the Internet transformed Alaskan life

Tracking Discourses Annika Egan Sjölander, Jenny Gunnarsson Payne, 2011-01-12 Written by researchers from a wide variety of disciplines this report explores the two most influential theoretical discourse traditions namely Discourse Theory and Critical Discourse Analysis Based on numerous Swedish and Scandinavian case studies this account reveals the usefulness of the study of discourse and exemplifies how the two discourse analytical perspectives can be combined to offer diverse and problem oriented strategies in the study of politics identity and social change **The ^AMultilingual Internet** Brenda Danet, Susan C. Herring, 2007-06-04 Two thirds of global Internet users are non English speakers Despite this most scholarly literature on the internet and computer mediated communication CMC focuses exclusively on English This is the first book devoted to analyzing Internet related CMC in languages other than English Identity Revisited and Reimagined Sangeeta Bagga-Gupta, Aase Lyngvær Hansen, Julie Feilberg, 2017-07-06 In contrast to other studies on identity this book takes its point of departure in the complexities that characterize and shape both individuals and societies past and present Its chapters challenge demarcated fields of study and conceptions of identity as gender identity as functional disability identity as race and identity as or based upon language groupings The contributions take a social practices perspective in their exploration of the performance living and doing of identity positions across time and space Many of the contributions take an intersectional stance and the majority report upon empirically driven studies that examine the ways in which micro level

analyses of naturally occurring human communication contribute to our understanding of identification processes. Specifically, they study the ways in which more recent dialogical and social theoretical analytical frameworks allow for attending to the complexity and dynamics of identity processes, the ways in which institutional settings, media settings, community of practices, and affinity spaces provide affordances and obstacles for different types of identity positions, and the ways in which shifts in identity positions can be traced across time and space.

Data Analysis, Interpretation, and Theory in Literacy Studies Research Michele Knobel, Judy Kalman, Colin Lankshear, 2020-04-17. Novice and early career researchers often have difficulty with understanding how theory, data analysis, and interpretation of findings hang together in a well-designed and theorized qualitative research investigation, and with learning how to draw on such understanding to conduct rigorous data analysis and interpretation of their analytic results. *Data Analysis, Interpretation, and Theory in Literacy Studies Research* demonstrates how to design, conduct, and analyze a well put together qualitative research project. Using their own successful studies, chapter authors spell out a problem area, research question, and theoretical framing, carefully explaining their choices and decisions. They then show in detail how they analyzed their data and why they took this approach. Finally, they demonstrate how they interpreted the results of their analysis to make them meaningful in research terms. Approaches include interactional sociolinguistics, microethnographic discourse analysis, multimodal analysis, iterative coding, conversation analysis, and multimodal discourse analysis, among others. This book will appeal to beginning researchers and to literacy researchers responsible for teaching qualitative literacy studies research design at undergraduate and graduate levels. Perfect for courses such as Literacy Research Seminar, Introduction to Qualitative Research, Advanced Research Methods, Studying New Literacies, and Media Research. Perspectives in Literacy Discourse Analysis, Advanced Qualitative Data Analysis, Sociolinguistic Analysis, Classroom Language Research.

Posthumanism and the Digital University Lesley Gourlay, 2020-12-10 It is a commonplace in educational policy and theory to claim that digital technology has transformed the university the nature of learning and even the essence of what it means to be a scholar or a student However these claims have not always been based on strong research evidence What are students and scholars actually doing in the day to day life of the digital university This book examines in detail how the world of the digital interacts with texts artefacts devices and humans in the contemporary university setting Weaving together perspectives from a range of thinkers and disciplinary sources Lesley Gourlay draws on ideas from posthuman and new materialist theory in particular to open up our understanding about how digital knowledge practices operate She proposes that digital engagement in the university should not be regarded as virtual or disembodied but instead may be understood as a complex set of entanglements of the body texts and material artefacts making a case that agency and the ways in which knowledge emerges should be regarded as more than human
