**Our Precarious Habitat** Melvin A. Benarde,1989-05-02 If you think the world is a time bomb ready to explode consider this Cancer deaths are going down not up. The infant mortality rate is at an all time low while our population over 60 is at an all time high. The 1988 U.S. summer drought was caused by tropical disturbances in the Pacific Ocean and contrary to the popular media had little to do with the greenhouse effect. Here's the book that explodes the many myths about *Our Precarious Habitat*. Fifteen Years Later Earth Day 1970 Apocalyptic such as eminent physiologist and Nobel Laureate George Wald were predicting large scale environmental doom by the year 2000 and a movement was under way that would influence our thoughts and opinions about the health of the planet to this day. Today nearly twenty years later those predictions appear well off the mark. In this book Dr Melvin Benarde one of today's leading environmental experts challenges the remaining environmental myths of our time. He comes armed with a healthy skepticism of the facts plus scientifically documented evidence indicating in many cases that our precarious habitat is not as precarious as the doomsayers would have us believe. Questioning current environmental myths is an idea whose time has come. By initiating the inquest *Our Precarious Habitat* stands at the forefront of a new environmental era an era whose watchword is accountability. This book benefits all of us concerned citizens elected officials members of industry and the media alike who want a clearer perspective on the issues that will determine our environmental fate.     **Our Precarious Habitat** Melvin A. Benarde,1973     *Our Precarious Habitat* Melvin A. Benarde,1973     **You've Been Had!** Melvin A. Benarde,2002 To his fellow environmentalists epidemiologist Benarde argues that people will continue to care about the environment even if they are not terrified into believing they are about to drop dead from an imminent epidemic of some horrible disease.
