## **Our Stolen Future:**

**Our Stolen Future** Theo Colborn,Dianne Dumanoski,John Peterson Myers,1997-03-01 A critically important book that forces us to ask new questions about the synthetic chemicals that we have spread across this earth former vice president Al Gore author of An Inconvenient Truth Our Stolen Future examines the ways that certain synthetic chemicals interfere with hormonal messages involved in the control of growth and development especially in the fetus The developing fetus uses these natural hormonal messages which come from both from its own hormone system and from its mother to guide development They influence virtually all of the growing individual's characteristics from determining its sex to controlling the numbers of toes and fingers to shaping intricate details of brain structure Scientific research over the last 50 years has revealed that this hormonal control of development is vulnerable to disruption by synthetic chemicals Through a variety of mechanisms hormone disrupting chemicals also known as endocrine disrupting chemicals or endocrine disruptors interfere with the natural messages and alter the course of development with potential effects on virtually all aspects of bodily function Our Stolen Future explores the scientific discovery of endocrine disruption The investigation begins with wildlife as it was in animals that the first hints of widespread endocrine disruption appeared The book then examines a series of experiments examining endocrine disruption of animals in the laboratory which show conclusively that fetal exposure to endocrine disrupting chemicals can wreak life long damage These experiments also reveal some of the biological processes by which these chemicals have their effects and that endocrine disruption effects can be caused by exposure to infinitesimally small amounts of contaminant Moving from animals to people Our Stolen Future summarizes a series of well studied examples where people have been affected by endocrine disrupting chemicals most notably the synthetic hormone diethylstilbestrol DES to which several million women were exposed through misguided medical attempts to manage difficult pregnancies in the 1950s 60s and 70s Our Stolen Future then asks a broader more difficult and more controversial set of questions Given what is known from wildlife and laboratory studies and from examples of well studied human exposure and given that exposure to endocrine disrupting chemicals in the real world is widespread at levels comparable to those sufficient to cause animal harm what effects should health scientists be looking for in people in general Effects to be expected include declines in fertility and other impacts on the reproductive system of both men and women impairments in disease resistance and erosions in intelligence Our Stolen Future ,1997\* Official web site for the book Our stolen future Addresses endocrine disruption persistent organic pollutants fetal development and fertility Includes new research on the same topic and reviews of the book Our 'Stolen Future' and the Precautionary Principle , The American Council on Science and Health ACSH presents the full text of the article entitled Our Stolen Future and the Precautionary Principle written by Elizabeth M Whelan The article was originally published in the volume eight number three 1996 issue of Priorities for Health Whelan discusses the book entitled Our Stolen Future which asserts that trace levels of environmental endocrine disrupters may result in

disasters The Precautionary Principle plays a key role in the writing of the book and is used in situations where the scientific evidence is very tentative Our Daily Poison Marie-Monique Robin,2014 Over the last thirty years we have seen an increase in rates of cancer neurodegenerative disease reproductive disorders and diabetes particularly in developed countries At the same time since the end of World War II approximately 100 000 synthetic chemical molecules have invaded our environment and our food chain In Our Daily Poison award winning journalist and documentary filmmaker Marie Monique Robin investigates the links between these two concerning trends revealing how corporate interests and our ignorance about these invisible poisons may be costing us our lives The result of a rigorous two year long investigation that took Robin across three continents North America Europe and Asia Our Daily Poison documents the many ways in which we encounter a shocking array of chemicals in our everyday lives from the pesticides that blanket our crops to the additives and plastics that contaminate our food and their effects on our bodies over time Gathering as evidence scientific studies testimonies of international regulatory agencies and interviews with farm workers suffering from acute chronic poisoning Robin makes a compelling case for outrage and action *At Any Cost* Thomas F. O'Boyle,2011-01-12 O Boyle has researched and written a monumental book that should be mandatory reading for all CEOs and anyone concerned with business ethics The Philadelphia Inquirer Superb a spirited study of General Electric and of its sometimes brilliant sometimes bungling but always ruthless boss Jack Welch Chicago Sun Times With convincing passion and meticulous research Thomas F O Boyle explores the forces behind General Electric s rise to the top of Wall Street questioning if GE with chief executive officer Jack Welch at the helm is still bringing good things to life Welch explosive profit hungry and pragmatic catapulted GE s stocks to the top up 1 155 percent from 1982 to 1997 O Boyle argues that these astounding results have come only with the heavy price of employees lives blighted under the tyranny of Neutron Jack Welch so named for his bomb like ability to eliminate staff without disturbing surrounding operations During Welch s reign hard nosed success tactics unblinking downsizing ruthless acquisition negotiations and the virtual abandonment of manufacturing in favor of the more glamorous entertainment and financial services industries coexist with scandals like price fixing pollution and defense contract fraud Sure to spark controversy this gripping comprehensive account begs the greater question Is Jack Welch s GE a model company for business in the next century or is it time to change the way the world does business Smoothly written and thoroughly researched USA Today This book makes a valuable contribution to our understanding of corporate America Thomas F O Boyle persuades you that GE Jack Welch s GE brings bad things to life In abundance Washington Monthly

**The Business of Consumption** Laura Westra,Patricia Hogue Werhane,1998 At the forefront of international concerns about global legislation and regulation a host of noted environmentalists and business ethicists examine ethical issues in consumption from the points of view of environmental sustainability economic development and free enterprise Visit our website for sample chapters **Living in Integrity** Laura Westra,1998 This innovative book takes a new look at

environmental ethics and the need for ecological and biological integrity Laura Westra explores the necessity for radical alteration not only of interpersonal ethics but also of social institutions and public policy In the process Westra denies the validity of majority rule in environmentally ethical concerns Issues discussed in the book include the link between ecological integrity and human health an environmental evaluation of business and technology biotechnology and transgenics in agriculture and aquaculture and the environmental ethics of the ancient Greeks and Kant Living in Integrity is a valuable book for philosophers and environmentalists alike     Silent Winter Joanna Moore,2021-05-01 Silent Winter is about the silent spread of toxic chemicals in our daily lives and their role in the growing prevalence of illnesses such as cancer chronic fatigue diabetes asthma digestive issues depression dementia and others The scientific evidence about chronic illness and toxic chemicals is withheld from us through stunningly elaborate efforts so that business can continue as usual

Approximately 45% of the adult US population now has at least one chronic illness and chronic illness is commonly caused by chronic exposure to toxic chemicals We are often told that these diseases are a result of our lifestyle or our genes We rarely hear that chronic illness is on the rise as a result of toxic chemicals in consumer products and throughout our environment Industry does not want to change so it is forcing us to change on an evolutionary level to deal with the onslaught of chemicals in our daily lives When we cannot keep up and get ill we are sold chemical solutions to make us feel better But individuals and families dealing with chronic illness often know or suspect that toxic chemicals have played a role in the demise of their health The author also shows how the problem is covered up at a societal level by obscuring what we know and how discussion of possible solutions is silenced by manipulating the marketplace Millions of human lives are being muted as a result of chronic illness Finally the author discusses our way out of this mess In the 1962 book Silent Spring Rachel Carson dedicated one short chapter to the anticipated human health impacts from toxic chemicals That chapter seeded the present work Silent Winter which was written after sixty additional years of scientific research and widespread human exposure to a variety of toxic chemicals In Our Stolen Future 1996 Theo Colborn et al warned of the potential dangers of hormone disrupting chemicals on human health Nearly another 25 years have passed since that writing Silent Winter reveals the observed impacts of these hormone disrupting chemicals on human health     The Workbook ,1996     **Seeing Nature**

**Through Gender** Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical

representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet *The Pragmatist* ,1997 *SEJ Journal* ,1996 *The New Republic* Herbert David Croly,1999 *Tomorrow* ,1996 **AIM Report** Accuracy in Media, inc,1996 *The Conservative* ,1901 A journal devoted to the discussion of political economic and sociological questions **The Environmental Guidebook** Jeff Staudinger,2002 This directory profiles environmental organizations and other entities involved with environmental preservation focusing on the US and on national rather than regional groups and giving only limited coverage to research organizations within universities and to higher education listings environmentally related degree programs Each of the 493 entries provides a summary of the organization s mission and programs its budget numbers and contact information The guide primarily lists non governmental organizations and government agencies with smaller sections on the United Nations business groups labor unions and opposing groups An index would have improved the usefulness of the reference The author is an environmental engineer and founder of the non profit organization Environmental Frontlines Annotation copyrighted by Book News Inc Portland OR *Good Reasons with Contemporary Arguments* Lester Faigley,Jack Selzer,2001 This brief rhetoric of argument with an anthology of readings on contemporary issues takes a non Toulmin based approach to writing arguments in an electronic age By stressing the rhetorical situation and the audience the rhetoric avoids complicated terminology in favor of providing students with the practical means to find good reasons for the positions they want to advocate The rhetoric includes readings by professional and student writers including a pivotal selection from Rachel Carson s extraordinarily influential argument *Silent Spring* The anthology reprints over 60 arguments on interesting current issues the environment affirmative action censorship Title IX substance abuse gay rights and the body **William and Mary Environmental Law and Policy Review** ,2003 Regulation ,1996
