## **Out From Eden:**

*Out of Eden* Paul W. Kahn, 2009-01-10 Paul Kahn's book is one of the deepest meditations on evil that I have read. It is insightful, rich, and original. Moshe Halbertal, Hebrew University, Jerusalem. In *Out of Eden*, Paul W. Kahn offers a philosophical meditation on the problem of evil. He uses the Genesis story of the Fall as the starting point for a profound articulation of the human condition. Kahn shows us that evil expresses the rage of a subject who knows both that he is an image of an infinite God and that he must die. Kahn's interpretation of Genesis leads him to inquiries into a variety of modern forms of evil, including slavery, torture, and genocide. Kahn takes issue with Hannah Arendt's theory of the banality of evil, arguing that her view is an instance of the modern world's lost capacity to speak of evil. Psychological, social, and political accounts do not explain evil as much as explain it away. Focusing on the existential roots of evil rather than on the occasions for its appearance, Kahn argues that evil originates in man's flight from death. He urges us to see that the opposite of evil is not good but love, while evil would master death, love would transcend it. Offering a unique perspective that combines political and cultural theory, law, and philosophy, Kahn here continues his project of advancing a political theology of modernity. This is no ordinary account of what is usually meant by the problem of evil. Instead, Paul W. Kahn's aim is to explore the nature of evil itself. A rich and fascinating book full of unusual conjunctions and insights. John Habgood, *Times Literary Supplement*. [Eve Out of Eden](#), James Alfred Houser, 1884 **Out of Eden: The Peopling of the World** Stephen Oppenheimer, 2012-03-01 In a brilliant synthesis of genetic, archaeological, linguistic, and climatic data, Oppenheimer challenges current thinking with his claim that there was only one successful migration out of Africa. In 1988, *Newsweek* headlined the startling discovery that everyone alive on the earth today can trace their maternal DNA back to one woman who lived in Africa 150,000 years ago. It was thought that modern humans populated the world through a series of migratory waves from their African homeland. Now, an even more radical view has emerged: that the members of just one group are the ancestors of all non-Africans now alive, and that this group crossed the mouth of the Red Sea a mere 85,000 years ago. It means that not only is every person on the planet descended from one African Eve, but every non-African is related to a more recent Eve from that original migratory group. This is a revolutionary new theory about our origins, that is both scholarly and entertaining, a remarkable account of the kinship of all humans. Further details of the findings in this book are presented at [www.bradshawfoundation.com/stephenoppenheimer](http://www.bradshawfoundation.com/stephenoppenheimer). *Out of Eden* Beverly J. Stratton, 1995-01-01 *Out of Eden* contributes towards conversations about interpreting scripture. Rather than adopting traditional views of creation and fall, or growth, this study integrates literary, critical theories, and feminist scholarship to read the Genesis narrative in relation to concerns of contemporary communities. The question of how we might engage the interpretative process and the rhetorical power of texts as we live our lives out of Eden is addressed. Stratton argues that the interpretation of Genesis 2-3 matters, that there are consequences for the actions we take on the basis of our interpretations, and that we should enter the interpretative process only with care. **The Holy**
