## **Out For The Count The 1997 General Elect:**

*Kenya's 2013 General Election* Njogu, Kimani, Wekesa, Peter Wafula, 2017-08-09 When voters enthusiastically turn up to cast their vote during general elections they expect that their action would meaningfully change their lives But in most of Africa even when elections are held on a regular basis voters are quite often disappointed by the performance of their leaders who use the new positions as an opportunity to loot public resources and consolidate power It is almost as if elections are of minimal value to the populace Notwithstanding this trend when they are free and fair general elections can be transformative They can bring into the political arena men and women of integrity committed to service and accountability Inspired by the determination to have inclusive governance and the advancement of democracy Kenya's 2013 General Election Stakes Practices and Outcomes asks important questions related to political participation coalition building politics of identity the international criminal court electoral systems and institutions and the judiciary The papers are written by mainly Kenyan academics and civil society actors who examine the drivers of the 2013 general elections and the sources of the mandate to lead This book is part of publications by Twaweza Communications on democratic practice and accountable governance in Kenya

*Out for the Count* M. M. E. M. Rutten, Alamin Mazrui, François Grignon, 2001 On 29 December 1997 Kenyans went to the polls to choose their president and parliamentary and civic representatives Some earmarked the 1997 elections as perhaps the most important ones in the history of the country This book presents a comprehensive analysis of the election from a local perspective Specialists on Kenyan politics discuss both the national and local levels of politics in the country Did the Likoni clashes favour the success of the local Shirikisho party at the coast What went wrong for Charity Ngilu Kenya's first presidential candidate in her Ukambani backyard How did the opposition win seats in the traditionally pro KANU zones of the Rift Valley province And how did the ruling party win in the Westlands constituency in Nairobi The book also deals with the technical aspects of the 1997 elections such as registration campaigning and vote counting The experiences of a new model of election observation are also highlighted

**Kenya** Charles Hornsby, 2013-03-01 Since independence from Great Britain in 1963 Kenya has survived five decades as a functioning nation state holding regular elections its borders and political system intact and avoiding open war with its neighbours and military rule internally It has been a favoured site for Western aid trade investment and tourism and has remained a close security partner for Western governments However Kenya's successive governments have failed to achieve adequate living conditions for most of its citizens violence corruption and tribalism have been ever present and its politics have failed to transcend its history The decisions of the early years of independence and the acts of its leaders in the decades since have changed the country's path in unpredictable ways but key themes of conflicts remain over land money power economic policy national autonomy and the distribution of resources between classes and communities While the country's political institutions have remained stable the nation has changed its population increasing nearly five fold in five decades But the economic and political elite's struggle for

state resources and the exploitation of ethnicity for political purposes still threaten the country's existence Today Kenyans are arguing over many of the issues that divided them 50 years ago The new constitution promulgated in 2010 provides an opportunity for national renewal but it must confront a heavy legacy of history This book reveals that history

**The Moral Economy of Elections in Africa** Nic Cheeseman, Gabrielle Lynch, Justin Willis, 2021-02-18 Do elections turn people into democratic citizens Elections have long been seen as a way to foster democracy development and security in Africa with many hoping that the secret ballot would transform states Adopting a new approach that focusses on the moral economy of elections Nic Cheeseman Gabrielle Lynch and Justin Willis show how elections are shaped by competing visions of what it means to be a good leader bureaucrat or citizen Using a mixed methods study of elections in Ghana Kenya and Uganda they explore moral claims made by officials politicians civil society international observers and voters themselves This radical new lens reveals that elections are the site of intense moral contestation which helps to explain why there is such vigorous participation in processes that often seem flawed Demonstrating the impact of these debates on six decades of electoral practice they explain why the behaviour of those involved so frequently transgresses national law and international norms as well as the ways in which such transgressions are evaluated and critiqued so that despite the purported significance of vote buying the candidates that spend the most do not always win

**Media and Identity in Africa** John Middleton, Kimani Njogu, 2010-01-04 What is the role of the media in Africa How do they work How do they interact with global media How do they reflect and express local culture Incorporating both African and international perspectives Media and Identity in Africa demonstrates how media outlets are used to perpetuate question or modify the unequal power relations between Africa and the rest of the world Discussions about the construction of old and new social entities which are defined by class gender ethnicity political and economic differences wealth poverty cultural behavior language and religion dominate these new assessments of communications media in Africa This volume addresses the tensions between the global and the local that have inspired creative control and use of traditional and modern forms of media

**Two Countries One Dream** Rok Ajulu, 2009

**When Kenyans Spoke**, 2003

*The Politics of Party Coalitions in Africa* Denis Kadima, 2006 This important book goes some way to filling that vacuum The authors document analyse and explain various aspects of the coalition process as it has played itself out in Kenya Malawi Mauritius Mozambique and South Africa and in the concluding chapter compare and draw lessons from the experiences of the five countries

**Our Turn to Eat** Daniel Branch, Nicholas Cheeseman, Leigh Gardner, 2010 This book provides an overview of the troubled process of nation building in post colonial Kenya Despite the distinctive features of the Moi and Kenyatta regimes contributors make the case that since the late colonial period continuity and not change has been the dominant theme in Kenyan political life Through a range of methodological lenses and empirical material the chapters highlight different aspects of this continuity the strength of the provincial administration the weakness of formal party

structures the central role of ethnicity in shaping political competition the understanding of the state as a resource in itself and the ultimately incompatible beliefs held by different communities regarding how power can be legitimately exercised Taken together the persistence of these factors over time helps to explain the failure of the nation building project in Kenya and the context within which disputed elections in late 2007 could lead to the collapse of political order and the deaths of over 1 000 Kenyans

**The Heart and Soul of the Party** Magnus Öhman,2004 This is a Ph D dissertation Although most countries south of the Sahara introduced multiparty systems more than a decade ago much remains to be understood about the political parties active within these systems General statements about African parties are common but tend to lack support from systematic research Among the least studied areas is African party organization including such issues as how parties function and who decides what One useful way of studying the power dynamics within political parties is to analyze how parliamentary candidates are selected While a common theme in party research in established democracies this is the first systematic study of the subject in Africa This book analyzes the selection system used in recent elections in 31 parties in 17 African countries while a closer study of Ghana offers more detailed information It is found that the selection process in many political parties is significantly more decentralized than general theories about African parties would suggest In sharp contrast to arguments about the stability of African elites incumbent Members of Parliament are often very vulnerable to challenges from other aspirants in their parties It is argued that the logic of clientelism plays an important role in explaining these findings
