

What are Outcome measures?

- Outcome measures are standardized tests, measures, or instruments used to measure various aspects of a patient's health status.
- Results from outcome measures can be used for patient care decisions, research, and quality assurance.
- An evidence-based practitioner must consider the dimension, type, format, reliability, validity, responsiveness, and feasibility an appropriate outcome measure for their patient.

resources on Evolve Additional Case Studies Fully updated with the most recent research data procedures and guidelines from expert international critical care nursing clinicians and academics Increased focus on pandemic related considerations including COVID 19 woven throughout all chapters Post-Intensive Care Syndrome Jean-Charles Preiser, Margaret Herridge, Elie Azoulay, 2019-08-31 This book part of the European Society of Intensive Care Medicine textbook series provides detailed up to date information on the physical cognitive and psychological impairments that are frequently present following a stay in an intensive care unit and examines in depth the available preventive and therapeutic strategies including adapted rehabilitation programs Beyond acquainting readers with the multiple facets of post intensive care syndrome PICS the book aims to promote the effective follow up of patients thereby enhancing their ability to work and their functional autonomy and to identify risk factors for the development of PICS as a stimulus to beneficial organizational changes in intensive care departments The background to the book is the realization by healthcare providers that the quality of life of patients who have required a stay in an intensive care unit can be severely impaired or even become unacceptable All too often the diverse sequelae are overlooked by specialists of other disciplines Moreover families and caregivers are also at high risk of post traumatic stress disorder and depression The European Society of Intensive Care Medicine has developed the Lessons from the ICU series with the vision of providing focused and state of the art overviews of central topics in Intensive Care and optimal resources for clinicians working in Intensive Care This book written by renowned experts in the field will facilitate the transmission of key knowledge with significant clinical and financial benefits **Palliative Care in Critical Care, An Issue of Critical Care Nursing Clinics of North America** Tonja Hartjes, 2016-07-22 Intensive care units ICUs provide comprehensive advanced care to patients with serious or life threatening conditions and consequently a significant amount of end of life care EOLC Indeed approximately 20% of deaths in the U S are associated with an ICU stay and nearly half of U S patients who die in hospitals experience an ICU stay during the last 3 days of life Despite the commonality of the ICU experience ICU patients typically suffer from a range of distressing symptoms such as pain fatigue anxiety and dyspnea causing families significant distress on their behalf Thus there is a growing imperative for better provision of palliative care PC in the ICU which may prevent and relieve suffering for patients with life threatening illnesses Effective palliative care is accomplished through aggressive symptom management communication about the patient and family s physical psychosocial and spiritual concerns and aligning treatments with each patient s goals values and preferences PC is also patient centered and uses a multidisciplinary team based approach that can be provided in conjunction with other life sustaining treatments or as a primary treatment approach Failure to align treatment goals with individual and family preferences can create distress for patients families and providers If implemented appropriately palliative care may significantly reduce the health care costs associated with intensive hospital care and help patients avoid the common non person centered treatment that is wasteful distressing and potentially harmful Due to the success of many PC programs administrators providers and accrediting bodies

are beginning to understand that palliative care in the ICU is vital to optimal patient outcomes

For Patients in the ICU on Mechanical Ventilation, which Outcome Measure Has the Best Clinimetric Properties for Measuring Physical Function? Geoffrey Hulse,Alaina Murphy,Olivia Seely,2020 ABSTRACT Background Post intensive care syndrome PICS is characterized by the severe functional decline of a patient affecting physical cognitive and psychological function disproportionate to the length of stay Establishing an outcome measure to accurately determine a patient s level of function at baseline will help guide treatment measure progress and aid prognostication The purpose of this literature review is to make a clinical decision of the best outcome measure to use for patients in the intensive care unit ICU for determining physical function Methods A comprehensive literature search was conducted using the Medline CINAHL PubMed and Google Scholar databases between September 2019 and July 2020 Search terms included outcome assessment measure tool ICU validity and reliability and physical therap physiotherap rehabilitation Articles were included if they were used in a critical care setting assessed psychometric clinimetric properties measured an aspect of physical function and were peer reviewed Articles were excluded if they assessed measures that physical therapists could not perform no part of the population was on mechanical ventilation MV only included female participants or not published in English Results The primary search strings yielded 65 articles After scanning the abstracts 6 articles met the inclusion and exclusion criteria and were chosen to be included in this literature review Discussion Conclusion The literature found 5 commonly used outcome measures in the ICU Of those 5 outcome measures the CPax and PFIT had the strongest clinimetric properties supporting their use in the ICU The aspects of physical function measured included bed mobility sitting and standing balance and assistance required There was not a single outcome measure found to be the best but the CPax was determined to be the most appropriate outcome measure to use for patients on mechanical ventilation due to low floor effect focus on functional tasks ability to follow patient progress and easy communication of results to patient family other healthcare providers
