### **Outdoor**

**Emergency Care** Warren D. Bowman, 1988 Written by Warren D. Bowman M.D. the National Ski Patrol's national medical director this third edition incorporates major changes in prehospital emergency care training that have been established nationally by the Emergency Medical Services system since the second edition was published in 1993 The textbook targets many elements of emergency care in the nonurban environment including environmental injuries and illnesses such as altitude sickness deep frostbite and hypothermia skiing snowboarding and other outdoor injuries and the special equipment and techniques used by patrollers and other nonurban rescuers Back cover

### **Outdoor Emergency Care** Edward C.

McNamara, David H. Johe, Deborah A. Endly, 2021 For over eighty years the National Ski Patrol NSP has trained people who have successfully cared for thousands of injured snow sports enthusiasts Early in its history an Advanced Red Cross first aid course was used for training Since that time pre hospital care has significantly changed The public has greater expectations of care now so the NSP has improved the patrol leader's level of training to that of an NHTSA National Highway Traffic Safety Administration Emergency Medical Responder Today there are a variety of outdoor activities available at ski areas bike parks

and other land management areas that occur during all seasons of the year. As a result the NSP changed the medical training of patrollers to cover not just snow sports but a variety of other non winter activities including mountain biking ziplining downhill bike racing and bike parks. In the mid 1980's Dr Warren Bowman the National Medical Advisor for the NSP created a text and course called Winter Emergency Care providing prehospital medical care training for ski patrollers. Today the program aptly named Outdoor Emergency Care is the backbone of the NSP's medical training program. It is also the standard of training for other organizations using an Emergency Medical Responder curriculum involved with outdoor recreation. Outdoor Emergency Care (OEC) is the primary resource for a student who wants to become a ski or bicycle patroller or prehospital first responder called an OEC Technician. It also has value for other outdoor enthusiasts. It bridges the gap between urban medical responders with immediate access to an ambulance and advanced equipment and wilderness search and rescue personnel who are several hours from advanced care. No other comprehensive medical textbook covers this niche of prehospital care. River rafters, rope course rescuers, cavers, park rangers, mountain bike race personnel, search and rescue personnel, rescuers at large sporting events and outdoor concerts will find the information in this text invaluable when providing care for patients.
