The Evolution of the Toyota Production System Kazuo Wada, 2020-06-09. This book utilizes historical evidence to describe the development of the Toyota Production System (TPS). The development of TPS typifies the transformation of production control in interchangeable industries in the twentieth century. Much of the extensive literature available on TPS has been geared toward describing TPS from a number of different perspectives. Many researchers consider TPS distinct from American mass production systems. Although TPS and more generally the production control systems in the Japanese assembly industry has differentiated itself from similar US production systems, the evolution of TPS is largely attributable to attempts to learn from, imitate, and modify pre-World War II US production methods. Through these efforts, TPS has achieved levels of efficiency in Japan comparable to those of US production systems. Additionally, a reliance on Information and Communication Technology (ICT) in relation to production control has facilitated the development of TPS. The literature on TPS, however, has largely ignored the vital relationship between ICT and production control due to an inordinate focus on Kanban. Kanban translates to signboard in Japanese but is used to refer to an organic linkage between work in preceding and subsequent production processes. This book sheds light on the development of a fully digitalized Bill of Materials (BOM) at Toyota behind its Kanban and production control.

A Confucian Analysis on the Evolution of Chinese Patent Law System Nan Zhang, 2020-07-08. This book comprehensively discusses the main features of the Chinese patent law system which not only legally transplants international treaties into the Chinese context but also maintains China's legal culture and promotes domestic economic growth. This is the basis for encouraging creativity and improving patent law protection in China. The book approaches the evolution of the Chinese patent system through the ancient Chinese philosopher Confucius's classic principle offering readers a fresh new way to understand and analyze Chinese patent law reforms while also outlining how Confucian insights could be used to improve the enforcement of patent law and overall intellectual property protection awareness in China. It examines ancient Chinese innovation history, explores intellectual property from a Confucian perspective, and discusses the roots of Chinese patent law as well as the past three amendments and the trends in the ongoing fourth amendment. In addition to helping readers grasp the mentality behind the Chinese approach to patent law and patent protection, the book provides an alternative research methodology and philosophical approach by demonstrating Confucian analysis which provides a more dynamic way to justify intellectual

property in the academic world Lastly it suggests future strategies for local industries in the legal cultural and sociological sectors in China which provide benefits for domestic and overseas patent holders alike The book offers a valuable asset for graduate students and researchers on China and intellectual property law as well as general readers interested in Asian culture and the philosophy of law *The Evolution of an American Patriot* Charles Frederick Dapp,1924
