The Next War Caspar Weinberger, Peter Schweizer, 1998-01-01 You can read The Next War as a military novel and find it riveting

The Next War in the Air Brett Holman, 2016-02-17 In the early twentieth century the new technology of flight changed warfare irrevocably not only on the battlefield but also on the home front As prophesied before 1914 Britain in the First World War was effectively no longer an island with its cities attacked by Zeppelin airships and Gotha bombers in one of the first strategic bombing campaigns Drawing on prewar ideas about the fragility of modern industrial civilization some writers now began to argue that the main strategic risk to Britain was not invasion or blockade but the possibility of a sudden and intense aerial bombardment of London and other cities which would cause tremendous destruction and massive casualties The nation would be shattered in a matter of days or weeks before it could fully mobilize for war Defeat decline and perhaps even extinction would follow This theory of the knock out blow from the air solidified into a consensus during the 1920s and by the 1930s had largely become an orthodoxy accepted by pacifists and militarists alike But the devastation feared in 1938 during the Munich Crisis when gas masks were distributed and hundreds of thousands fled London was far in excess of the damage wrought by the Luftwaffe during the Blitz in 1940 and 1941 as terrible as that was The knock out blow then was a myth But it was a myth with consequences For the first time The Next War in the Air reconstructs the concept of the knock out blow as it was articulated in the public sphere the reasons why it came to be so widely accepted by both experts and non experts and the way it shaped the responses of the British public to some of the great issues facing them in the 1930s from pacifism to fascism Drawing on both archival documents and fictional and non fictional publications from the period between 1908 when aviation was first perceived as a threat to British security and 1941 when the Blitz ended and it became clear that no knock out blow was coming The Next War in the Air provides a fascinating insight into the origins and evolution of this important cultural and intellectual phenomenon Britain's fear of the bomber

Next War John F. Antal, 2023-09-28 This thought provoking exploration of modern warfare addresses how the US must prepare to wage war in the age of rapid technological advancement Foreword by US Senator Mike Rounds The nature of war is constant change We live in an era of exponential technological acceleration which is transforming how wars are waged Today the battlespace is transparent multi domain sensors can see anything and long range precision fire can target everything that is observed Autonomous weapons can be unleashed into the battlespace and attack any target from above hitting the weakest point of tanks and armored vehicles The velocity of war is hyper fast Battle shock is the operational informational and organizational paralysis induced by the rapid convergence of key disrupters in the battlespace It occurs when the tempo of operations is so fast and the means so

overwhelming that the enemy cannot think decide or act in time Hit with too many attacks in multiple domains all occurring simultaneously the enemy is paralyzed In short the keys to decisive victory in war is to generate battle shock Should the US engage against Communist China a resurgent Russia in a European war or Iran in the Middle East how can our forces survive an enemy first strike in these circumstances Can we adapt to the ever accelerating tempo of war Will our commanders see and understand what is happening in order to plan decide and act in real time John Antal s *Next War* is a call to action for military strategists policymakers and anyone interested in understanding the future of conflict Study this book to learn what must be done to gain the foresight needed to deter or if deterrence fails to win the next war Colonel Roger C Fiske US Army Ret *Can America Win the Next War?* Drew Middleton,1975 *The Future of War in Its Technical, Economic, and Political Relations* Jan Bloch,1899 *Unity* ,1918 *Winning the Next War* Stephen Peter Rosen,1991 Rosen argues that armies and navies are not forever doomed to fight the last war Rather they are able to respond to shifts in the international strategic situation *The Theosophical Path* Katherine Augusta Westcott Tingley,1919 *A Guide to Diplomatic Practice* Ernest Mason Satow,1917 *Challenging Essays in Modern Thought* Joseph Morris Bachelor,Ralph Ledyard Henry,1928 *The Fortnightly* ,1887 *Our War Too* Margaret Paton-Walsh,2002 In the late 1930s a number of American women especially those allied with various peace and isolationist groups protested against the nation s entry into World War II While their story is fairly well known Margaret Paton Walsh reveals a far less familiar story of women who fervently felt that American intervention was absolutely necessary Paton Walsh recounts how the United States became involved in the war but does so through the eyes of American women who faced it as a necessary evil Covering the period between 1935 and 1941 she examines how these women functioned as political actors even though they were excluded from positions of power through activism in women s organizations informal women s networks and even male dominated lobbying groups In the Great Debate over whether America should enter the war some women favored aid to the Allies not because they hoped for war but because they hoped aid would forestall more direct U S involvement but also because they believed war was preferable to a Nazi victory Paton Walsh shows that this activism involved some of the most prominent women of their day Elizabeth Cutter Morrow whose son in law Charles Lindbergh was an isolationist spokesman supported the revision of the Neutrality Acts to allow the sale of arms to the Allies and expressed her support in a national radio broadcast Soon other women joined this debate Esther Brunauer of the AAUW journalist Dorothy Thompson and organizations like the League of Women Voters and National Women s Trade Union League broke from the pacifist tradition to advocate American aid for the Allied cause Focusing on the conflict in Europe Paton Walsh shows how these women grasped the implications of the Lend Lease program for America s entry into the war but supported it nevertheless By late 1941 the Women s Division of the Fight for Freedom Committee had been established no longer merely advocating aid to Britain to keep American boys out of battle this organization supported direct American involvement in the war as a means of

stopping Nazi oppression While most historians have focused on women s pacifism Paton Walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs Our War Too is a story of American women trying to reconcile the irreconcilable to preserve both their principles and their peace It expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on American public opinion over the build up to the war (vol.
