Turpin,Lester R. Kurtz,1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence

is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence The Web of Violence explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence The Web of Violence supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies
