The SAGE Handbook of Participatory Research and Inquiry Danny Burns, Jo Howard, Sonia M. Ospina, 2021-08-04

This SAGE Handbook presents contemporary cutting edge approaches to participatory research and inquiry. It has been designed for the community of researchers, professionals and activists engaged in interventions and action for social transformation and for readers interested in understanding the state of the art in this domain. The Handbook offers an overview of different influences on participatory research, explores in detail how to address critical issues and design effective participatory research processes, and provides detailed accounts of how to use a wide range of participatory research methods. Chapters cover pioneering new participatory research techniques including methods that can be operationalised at scale, approaches to engaging the poorest and most marginalised, and ways of harnessing technologies to increase the scope of participation amongst others. Drawing upon a wide range of disciplines and bringing together contributing authors from across the globe, this Handbook will be of interest to an international readership from across the broad spectrum of social sciences including social policy development, studies, geography, sociology, criminology, political science, health and social care, education, psychology, business management. It will also be an insightful and practical resource for facilitators, community workers and activists for social change. Part 1: Introduction; Part 2: Key Influences and Foundations of Participatory Research; Part 3: Critical Issues in the Practice of Participatory Research; Part 4: Methods and Tools; Part 4.1: Dialogic and Deliberative Processes; Part 4.2: Digital Technologies in Participatory Research; Part 4.3: Participatory Forms of Action Orientated Research; Part 4.4: Visual and Performative Methods; Part 4.5: Participatory Monitoring, Evaluation and Learning; Part 4.6: Mixing and Mashing Participatory and Formal Research; Part 5: Final Reflections Improving International Capacity Development J. Armstrong, 2013-05-07 Nothing is more important to a new, fragile or developing nation than developing the capacity of its government to support national well-being. Every society is complex, every government is complex. Yet well-intentioned international development aid, born in an era of infrastructure projects, continues to apply simplistic technical solutions to these wickedly complex development problems. It's an outside-in approach that rarely succeeds, even by the development industry's own admission. But out there amongst the billions of dollars of failed interventions, there are bright spots of success, places where capacity is harnessed not just for today but for tomorrow too. What is working so well? Drawing on research, practical experience and stories of success, Jim Armstrong explores these

emerging approaches *Participatory Research and Development for Sustainable Agriculture and Natural Resource Management* Julian F. Gonsalves,2005 Intended for aspiring and new practitioners of Participatory Research and Development PR D as well as field based researchers in developing countries Highlights that agricultural research and development has become a joint approach to deal with diverse biophysical environments multiple livelihood goals rapid changes in local and global economies and an expanded range for stakeholders over agriculture and natural resources

Outcome Mapping ,2001 This publication first discusses the challenges of assessing development impacts and reviews the development of a method to address these challenges called Outcome Mapping As development is essentially about people relating to each other their environment the focus of Outcome Mapping is on people organizations The originality of the methodology is its shift away from assessing the products of a program such as policy relevance poverty alleviation reduced conflict to focus on changes in behaviours relationships actions and or activities of the people organizations with whom a development program works directly It then describes this method its structure and its stages intentional design and outcome performance monitoring Finally the use of Outcome Mapping is outlined

Measuring Effectiveness in

Humanitarian and Development Aid Andre M. N. Renzaho,2007 Donor countries are currently scaling up their aid programmes in response to strategies proposed through the Millennium Development Goals Recent positive research on the impact of foreign development aid has led to increased expectations on the part of donor countries Research suggests that per capita income growth over the last decade would have been lower in the absence of aid and also that public sector expenditure on health and education in developing countries would not have been as great without aid inflows However there still remain many significant gaps in knowledge on aid allocation and effectiveness This book addresses a number of these gaps and provides many new and important analytical insights into aid Among the topics covered are the interface between aid allocation and perceptions of aid effectiveness the inter recipient concentration of aid from non government organizations the year on year volatility of aid impacts of aid on public sector fiscal aggregates and evaluation of the country level impacts of aid The book is an essential companion for professionals engaged in aid policy reforms and also for scholars in the areas of development economics international finance and economics
