## **Our Towns:**

Our Towns James Fallows, Deborah Fallows, 2018-05-08 NATIONAL BESTSELLER James and Deborah Fallows have always moved to where history is being made. They have an excellent sense of where world shaping events are taking place at any moment. The New York Times The basis for the HBO documentary streaming on HBO Max. For five years James and Deborah Fallows have travelled across America in a single engine prop airplane. Visiting dozens of towns the America they saw is acutely conscious of its problems from economic dislocation to the opioid scourge but it is also crafting solutions with a practical minded determination at dramatic odds with the bitter paralysis of national politics. At times of dysfunction on a national level reform possibilities have often arisen from the local level. The Fallowses describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself but it also reflects the energy the generosity and compassion the dreams and the determination of many who are in the midst of making things better. **Our Towns** is the story of their journey and an account of a country busy remaking itself. **Our Towns** Thea C. Durling, 2002-07. **Our Towns** is both a guide and a guideline for teachers who wish to try out cooperative learning. The book presents a multidisciplinary project that integrates math science language arts and social studies along with the English Language Teaching components reading writing speaking and listening. In the **Our Towns** project students are divided into small groups. Each group is given the description of a town this town becomes the focus of the project. Throughout the **Our Towns** project different events happen to the town such as a natural disaster. Students use information from various sources to respond to the events from the perspective of their community. **Our Towns** is a highly adaptable project. For example while originally designed for use with adult English as a Second Language learners it can be used with middle or high school students as well. Also the extension activities included offer additional multidisciplinary integration. The project as presented here is a minimum of 16 hours of class time. Teachers can use only parts of the project such as a given lesson for a shorter project. Also they can expand the project time by incorporating more in class research and reflection. This a teacher tested project that has great results. It gets students involved working together and thinking about important realities of daily life as they affect towns and communities. **Our Towns**, 1992. The suburbanization of Kentucky's small communities is a profoundly important thing. It is changing the character of the Commonwealth. **Our Town** is in part our effort to understand what is happening. We wanted to know whether any real towns remain or are likely to survive. Progress has a terrible appetite. We hoped in doing these stories to capture some pieces of the past before they are consumed in the maw of the future.
