**Our Universe** Russell Stannard, 1995 Offers a tour of the solar system discusses stars and galaxies and describes the Big Bang

Our Universe Faiz M. Khan, 2007-07 Did God create life or did the world spontaneously appear Drawing on meticulous research into the scientific and religious realms *Our Universe* is a detailed study of the origin of the universe life on Earth and the destiny of mankind Biophysics professor Faiz M Khan combines both faith and science to present a balanced overview of a highly controversial topic Khan explores the scientific analysis of creation with knowledge based dialogue about the most modern scientific thought on the beginnings of the universe cosmic evolution and biologic evolution and he contrasts these with the creationist view held by the world's major religions Concise and compelling *Our Universe* provides an unbiased and comprehensive view of some of philosophy's most debated topics and serves as a thoughtful springboard for further discussion Khan's discourse also reflects one man's painstaking quest for an answer to a fundamental question at the very core of our existence

style the author introduces all the relevant background and then carefully pieces together an engaging story of the evolution of our Universe We are left with a state of the art picture of scientists current understanding in cosmology and a keen taste of the excitement of this fast moving science Throughout no mathematics is used and all technical jargon is clearly introduced and reinforced in a handy glossary at the end of the book For general readers who want to get to grips with what we really do and don't know about our Universe this book provides an exciting and uncompromising read *Our Universe*, 2018-08-28

**Our Universe** Raman Sivashankar, 2017-09-27 How did the universe begin Will it last forever Why are we here For millennia scientists have tried to unravel the mysteries of the universe Our horizons have greatly expanded but numerous questions remain For many that gap between the known and the unknown is filled by religion But is there a better way to resolve uncertainty In this new essay collection author Raman Sivashankar explores the three ways humans try to explain the mysteries of our existence The first is through science Physicists trace the beginning of the world back billions of years and the genesis of the universe even further to the big bang Religions from Christianity to Islam to Hinduism have their own ways of explaining natural phenomena And then there is the occult considered at times both a pseudoreligion and a pseudoscience But could there also be some truth to what the conjurers soothsayers and paranormal investigators claim Our Universe an Unending Mystery illuminates the connections between science religion and the occult and examines the commonalities among different religions For readers who have niggling questions about the universe or are interested in a fresh perspective on existence this thought provoking new book offers fascinating answers **Unfolding Our Universe** Iain

Nicolson, 1999-10-28 Unfolding Our Universe is a comprehensive and accessible introduction to astronomy With a clear crisp text and beautiful colour illustrations it takes readers to the heart of the Universe explaining the facts concepts methods and frontiers of astronomical science The book can be read right through without referring to any mathematics For the more ambitious reader key points are developed in more detail and basic mathematics provided in self contained boxes A unique feature of Unfolding Our Universe is the careful balance it strikes between the basics of the subject and its frontiers Step by step it carefully assembles a complete understanding of astronomy Full colour throughout and a very readable text make this book a delight for the casual reader to browse while the clear and concise explanations will appeal to amateur astronomers science teachers and college and university students seeking a no nonsense introduction to astronomy *Understanding Our Universe* Stacy Palen, Laura Kay, George Blumenthal, 2018-09-16

**Our Universe a Journey Into Mystery** Jeff Jones, 2019-01-07 Like all books on the subject Our Universe is full of images of exploding stars and colliding galaxies There are powers and distances beyond human comprehension Darkness surrounds us as we discover most of this place we live in is not available to our eyes and senses It's all very nice but you want more than just another science on parade book There is a much more profound story hidden in the beautiful images spread over the scientific world Everything known to us comes from the Universe If this is correct can the Universe answer questions about meaning and purpose The answer is yes In the

past 25 years we have learned more about the Universe than in all recorded history This explosion of knowledge is due to three disruptive forces the personal computer the Internet and the great space and land based telescopes It is now possible to tell the story of the Universe in 21st century language and images that any interested layman can follow Using these tools the secrets of this extraordinary place are being laid bare The Universe is ready to answer our questions We are prepared to listen I pose three questions for the Universe to answer Who am I What is our home What is the purpose of my life It s a tall order for any book Our Universe uses the vehicle of science astronomy cosmology and the different ways humans know reality to allow the reader to answer these personal questions These threads are woven into a tapestry revealing the Universe in all its glory We don t know everything but we know enough The way forward is clear The journey is from where we are now back in time to the beginning and perhaps a moment before to what I call the Mystery Then we will turn around and watch this Unknowable come into being as our Universe The evolution of the Universe will be before our eyes There lie the answers The Mystery is not knowable or describable in any fashion yet the trajectory of our story sends us squarely into its midst It s where science human language and concepts fail Despite this it is our heritage We must deal with Mystery or we will forever be unfulfilled One of the discoveries will be to realize how all knowledge and the material world are directly related Their origins will be apparent The Big Bang will be found to be a process and not an event It is still becoming not only in the world around us but within as well There are no smoke and mirrors It is a non fiction story you can see for yourself The facts and conclusion are easily checked and the reader will not have to cross their fingers or set their minds aside to appreciate the story Come along for the Journey into Mystery This is the story I always wanted to write It is the story hopefully you are looking to discover     Solariad Surazeus Astarius,2017-10-15 Solariad of Surazeus Guidance of Solaria presents 114 920 lines of verse in 1 660 poems lyrics ballads sonnets dramatic monologues eulogies hymns and epigrams written by Surazeus 2006 to 2011     **The Formation of Our Universe** James L.
