Our Urban Planet:

Our Urban Planet in Theory and History Carl Nightingale, 2024-06-06 This Element offers seven propositions toward a theory of Our Urban Planet that is useful to global urban historians I argue that historians have much to offer to theorists particularly those involved in debates over planetary urbanization theory and the Anthropocene We must enlarge our concept of urban to include spaces that make cities possible and that cities make possible and become comfortable with longer temporal frames that nest global urban history within Earth Time Above all we need to add the crucial dimension of power redefining cities as spaces that humans produce to amplify harvests of geo solar energy and deploy human power within space and time The element uses insights from deep history to set the stage for a theory by verb elaborating the many paradoxes of humans 6 000 year gamble with the Urban Condition and explaining cities own intrinsic capacity to outrun their own theorizability Earthopolis Carl H. Nightingale, 2022-06-09 A panoramic study of our Urban Planet that takes readers on a six continent six millennia tour of the world s cities *Our Urban Planet* Ellen Eichenwald Switzer, 1980-01-01 Discusses the growth and development of various types of cities urban problems and their solutions and what the future may hold for cities *Earthopolis* Carl Husemoller Nightingale, 2022 This is a biography of Earthopolis the only Urban Planet we know of It is a history of how cities gave humans immense power over Earth for good and for ill Carl Nightingale takes readers on a sweeping six continent six millennia tour of the world s cities culminating in the last 250 years when we vastly accelerated our planetary realms of action habitat and impact courting dangerous new consequences and opening prospects for new hope In Earthopolis we peek into our cities homes neighborhoods streets shops eating houses squares marketplaces religious sites schools universities offices monuments docklands and airports to discover connections between small spaces and the largest things we have built The book exposes the Urban Planet s deep inequalities of power wealth access to knowledge class race gender sexuality religion and nation It asks us to draw on the most just and democratic moments of Earthopolis s past to rescue its future The Urban Planet Thomas Elmqvist, 2018-04-26 Over 100 scientists architects journalists artists and activists address creatively the unprecedented challenges facing an Urban Planet This title is also available Open Access *The Urban Planet. How Cities Save Our Future*, 2016 *Advancements in Architectural, Engineering, and Construction Research and Practice* AbdulLateef Olanrewaju, Silvana Bruno, 2024-10-03 This book offers a captivating discussion into the cutting edge developments at the intersection of architecture engineering construction and technology With a focus on the power of big data analytics and computational design this book delves into the transformative potential of these domains in shaping the built environment and business This book discovers the fusion of architectural and engineering innovations with the capabilities of big data analytics machine learning and AI and explores how this parallelism is revolutionizing the design process enhancing efficiency and opening new horizons for creativity This book steps into a world where predictive models statistical algorithms and what if scenarios drive advancements in architectural and

engineering practices and witnesses the seamless integration of technology in design generation data visualization task automation and performance testing It is an essential read for researchers and professionals seeking to leverage the potential of big data analytics to transform the built environment maintaining the central role of humans *Uprooting and Development* George V. Coelho, 2013-04-17 Uprooting has to do with one of the fundamental properties of human life the need to change and with the personal and societal mechanisms for dealing with that need As with the more general problems of change uprooting can be a time of human disaster and desolation or a time of adaptation and growth into new capacities The special quality of uprooting is that the need to change is faced at a time of separation from accustomed social cultural and environmental support systems It is this separation from familiar supports that either renders the uprooted vulnerable to the destructive consequences of change or creates freedoms for their evolution into new and constructive patterns of life Whether the outcomes will be destructive or constructive will be determined by the forces at work the nature and power of the uprooting forces versus the personal and societal capacities for coping with them Uprooting events are so widespread as to be compared with the major rites of life but with the difference that dislocation is involved Uprooting reaches from self imposed movements such as rural to urban migration running away and traveling abroad for schooling to natural and man made disasters such as earthquakes political oppression and war The impacts vary from the need to adapt to a new culture for an interim period of study to the desolating consequences of the total loss of family friends home and country *Cities of Opportunities* Jason Pomeroy, 2020-01-31 Culture refers to not only the arts but also other manifestations of human intellectual achievement regarded collectively It similarly refers to the customs institutions and achievements of a social group a people or a nation Innovation refers to the action or process of change alteration or revolution a new method of idea creation or product that may bring about change It is easy to assume that innovation may be juxtaposed to the preservation of culture and time tested rituals Yet as human settlements grew and as streets and squares evolved through the diverse exchanges of people trading celebrating rallying and socially interacting it should come as little surprise that cities and its places would become and continue to be centres of culture and innovation that can be inextricably linked Culture and Innovation in cities can potentially take on different complexions if viewed through the lens of academics and practitioners drawn from different geographies disciplines or fields of expertise when addressing particular urban challenges It is through this complexity of views that this book seeks to provide a broad perspective on culture and innovation in the context of global cities today and a rich cornucopia of insights from thought leaders within their respective fields to shape the cities of tomorrow *City Safari* Jenette Restivo, 2025-10-21 City Safari invites young explorers to look beyond the concrete and see their city in a whole new light At first glance a city block might seem like a gray wasteland cracked sidewalks over trimmed trees endless buildings But look a little closer and a hidden world comes to life High above squirrels nest in tangled treetops Raptors perch on skyscraper ledges Pigeons raise chicks on parking garage beams An owl

might be dozing in a hollow tree and a crevice in a stone wall could be the front door to a rodent's home Urban nature is everywhere if you know how to find it Part natural history guide part adventure manual City Safari helps middle grade readers become urban naturalists developing a sharp eye for wildlife hiding in plain sight With engaging facts fieldwork activities and a fresh perspective on everyday surroundings this book turns the city into a thrilling wilderness waiting to be discovered *The Urbanisation of the Sea* Nancy Couling, Carola Hein, 2020-12-02 The book tells the story of the sea land continuum based on the case of the North Sea one of the world's most industrialised seas in which the Netherlands plays a central role The space of the North Sea is almost fully planned and has been loaded with the task of increased economic production from new and traditional maritime sectors At the same time it has been emptied of cultural significance Through diverse projects from academia art literature and practice from analysis to design the book explores synergies for designing this new spatial realm Port city expert Carola Hein professor of the history of architecture urban planning at Delft University of Technology and Nancy Couling associate professor at the Bergen School of Architecture and researcher of the urbanised sea combine forces with interdisciplinary experts to guide the reader through this complex and fascinating topic

Wildness Gavin Van Horn, John Hausdoerffer, 2017-03-31 Whether referring to a place a nonhuman animal or plant or a state of mind wild indicates autonomy and agency a will to be a unique expression of life Yet two contrasting ideas about wild nature permeate contemporary discussions either that nature is most wild in the absence of a defiling human presence or that nature is completely humanized and nothing is truly wild This book charts a different path Exploring how people can become attuned to the wild community of life and also contribute to the well being of the wild places in which we live work and play Wildness brings together esteemed authors from a variety of landscapes cultures and backgrounds to share their stories about the interdependence of everyday human lifeways and wildness As they show far from being an all or nothing proposition wildness exists in variations and degrees that range from cultivated soils to multigenerational forests to sunflowers pushing through cracks in a city alley Spanning diverse geographies these essays celebrate the continuum of wildness revealing the many ways in which human communities can nurture adapt to and thrive alongside their wild nonhuman kin From the contoured lands of Wisconsin's Driftless region to remote Alaska from the amazing adaptations of animals and plants living in the concrete jungle to indigenous lands and harvest ceremonies from backyards to reclaimed urban industrial sites from microcosms to bioregions and atmospheres manifestations of wildness are everywhere With this book we gain insight into what wildness is and could be as well as how it might be recovered in our lives and with it how we might unearth a more profound wilder understanding of what it means to be human Wildness Relations of People and Place is published in association with the Center for Humans and Nature an organization that brings together some of the brightest minds to explore and promote human responsibilities to each other and the whole community of life Visit the Center for Humans and Nature's Wildness website for upcoming events and a series of related short films *Our Planet*, 2005
