Out on the Balcony for 365 Days Michael Anthony Lobevero,2000-03-01 Out On The Balcony For 365 Days is a collection of relationships that we all experience as we move with time Each book is unique to each reader as each day will bring old and new feelings to light in the discovery of who we were are and will be The understanding is that we want to convert our dreams from concrete to sand moved by the ocean on a warm summer night We are standing together on a Florida beach with the lights of the city laying on the waters edge Its a night of few clothes a white cotton one piece dress on her The dress is touching only her skin as it moves smoothly with the hand of the kind breeze His hands are moving through her hair with encouragement from the ocean scent Bare feet are everywhere with toes curling up and then down in the watery sand The ocean goes out and the ocean goes in with the sand moving in a sock like manner up our feet Our socks go away We kiss in the natural night light as the city goes by We see the stars behind each other We turn away and walk the same way leaving feet in the sand along the way Its a sandy highway The glow from the ocean sticks us in the eye under the bridge but the breeze sets us alone Our sand prints push us forward as we look back at the track There is no sense in going back What is behind us does not matter and it will go away when the ocean comes in to go out It will take what is behind us and pass it along to people of many countries and people of many interests The people of many countries have tracks behind them They look to our tracks and gives us theirs They hope to learn by teaching too A reflection in the tracks makes the path smooth with no prints anywhere The night moves quickly and the day winks good morning Tracks tracks everywhere going no where They are all sizes and some multiple sizes they come in one They zig and zag from the start of the sand and move to where they are covered for good Some have voices high and low Some voices speak and some just hum The tracks go and so do the seeing of them People go and we remember not them but our memories of them They were different than what we saw We did not see what we should see but rather thought of what we wanted to see so that we could be as we see This book will help in the discovery of what we want but run from because we have been taught that it is wrong to experience real living over learned living It will be with you forever

**Our Place in the Universe** Sun Kwok,2017-04-22 If you have ever wanted to understand the basic principles of astronomy and celestial movements you should read this book Using pictures of the sky observed from different places on Earth as well as drawings of ancient astronomical methods and tools Prof Sun Kwok tells this story in an entertaining and fascinating way Since the beginning of human civilization people have wondered about the structure of the cosmos and our place in the Universe More than 2 000 years ago our ancestors knew that the seasons were unequal the Earth was an unattached object floating in space and stars existed that they could not see From celestial observations they

concluded that the Earth was round Using simple tools and mathematics ancient astronomers accurately determined the sizes of the Earth and Moon the distance to the Moon and the lengths of the months and year With a clever device called the armillary sphere Greek astronomers could predict the times of sunrise and sunset on any day of the year at any place on Earth They developed sophisticated mathematical models to forecast Mars motions hundreds of years into the future Find out how ancient observers achieved these remarkable feats With minimal use of mathematics this book retraces the footsteps of our ancestors explains their intellectual journeys in simple terms and explores the philosophical implications of these discoveries
