schools of thought not unlike the development of conventional Economics where radical differences between Keynesian Classical and Monetarist approaches existed It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline This guide will provide both students and researchers in Comparative Economic Studies Islamic Economics and Islamic Finance with an essential overview of the field *Outlines of Islamic economics* ,1977 **Handbook of Ethics of Islamic Economics and Finance** Abbas Mirakhor,Zamir Iqbal,Seyed Kazem Sadr,2020-04-20 Since the financial crisis of 2007 2008 a renewed discussion on the ethics and finance is being examined from different dimensions finance for good society responsible finance ethical finance financial crimes and financial repression The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam What is its goal and how do its rules and practices ensure welfare for individuals and society Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology Is the present generation accountable for the welfare of future generations Where is the boundary between law and ethics and who guarantees their adoption and implementation

Contemporary Islamic Economic Thought Mohamed Aslam Haneef,1995 Islamic Economics: Principles and Analysis Moutaz Abojeib,Muhammad Anas Zarka,Muhammad Fahim Khan,Muhammad Irwan Ariffin,Muhammad Syukri Salleh,Rifki Ismal,Rokiah Alavi,Ruzita Mohd Amin,Saiful Azhar Rosly,Selamah Abdullah Yusof,Ugi Suharto,Zubair Hasan,Adam Abdullah,Adam Ng,Akhmad Affandi Mahfudz,Ataul Huq Pramanik,Gairuzazmi Mat Ghani,Hafas Furqani,Irum Saba ,Izyani Zulkifli,Kasule Twaha Ahmed,Maya Puspa Rahman,Mohammed Obaidullah,Mohd Azmi Omar,Mohd Nahar Mohd Arshad,Mohd Nizam Barom,Mohd-Pisal Zainal,Monzer Kahf,2018-12-01 With the impressive emergence of Islamic finance as a branch of Islamic economics the need for a solid knowledge base that encompasses theories thoughts and applications related to the subject increased in importance However writing about Islamic economics is a great challenge due to the differences in opinion on many of its issues This includes methodologies for determining the Islamic perspective on economic concepts and issues as well as applicable solutions for today s economic and social problems It is further argued that Islamic economics topics are not as clear as those in conventional economics as they have their own religious spiritual and social dimensions The points of controversy have generated lengthy discussions Moreover Islamic economics encompasses a vast array of topics and approaches from the purely theoretical which may include philosophy or religious ideas to mathematical and quantitative analyses We tried our best throughout this textbook to simplify clarify and summarise these concepts to make them accessible to all readers including students practitioners academics and even interested non specialists This

textbook presents discusses and analyses various topics and issues related to Islamic economics ranging from philosophical epistemological and methodological to microeconomic and macroeconomic perspectives In this endeavour the social aspect of Islamic economics an essential part of the discipline is not neglected The textbook compares Islamic ideas and concepts related to economics with those in conventional economics to highlight Islamic economics as a distinct field of knowledge with an emphasis on the ethical and social aspects The authors have tried their level best to explain the theoretical concepts as simply as possible without ignoring today s realities and without compromising Shar ah principles and objectives One of the main objectives of the book is to provide the reader with Islamic economic ideas and solutions that are realistic and applicable within the current highly globalised economic and business environment which is largely dominated by conventional interest based systems and institutions Despite being written for an elementary level audience this textbook can also be beneficial to a wide range of specialist and non specialist readers and seekers of knowledge For those specialising in Islamic economics it is an appropriate source of reference to gain an overview on different topics relating to the foundations of Islamic economics At this point however it must be mentioned that each topic deliberated upon by its nature would require a book on its own to cover all its aspects Therefore further exploration is required for Islamic economics specialists A list of references and recommended readings is provided for that purpose at the end of each chapter On the other hand students of mainstream economics finance and other academic majors will find this textbook an excellent resource for comprehensive knowledge of Islamic economics and its related issues Universities may benefit from the different topics presented in this textbook in designing or preparing their economics courses at different levels based on their own curriculums and classes This textbook could be used at the undergraduate level or even for a master s level economics or Islamic economics course especially in an Islamic banking and finance programme or for an MBA having a specialisation in Islamic banking and finance where an economics or Islamic economics course is offered Furthermore practitioners and interested readers who are seeking essential and simple knowledge about Islamic economics will also find this textbook to be a helpful guide It is important to mention here that Islamic economics literature shows wide differences among the scholars in almost every subtopic Presenting all opinions within a limited number of pages is almost impossible However with the great contribution of more than 60 scholars from a wide span of countries and from various economic schools this book represents an important attempt to present the topics and issues from various perspectives with the maximum objectivity possible Through comprehensive content editing the editors have striven to improve the flow of arguments remove inconsistencies and put the ideas together in as coherent a manner as possible However the editors acknowledge that some biases and overlaps may still persist
