An Outline of Psychiatry in Clinical Lectures Robert Miller, ONZM, B.A., B.Sc., Ph.D., John Dennison, J.P., M.Sc., B.A., 2015-08-27 This work is a collection of Carl Wernicke's lectures on neuropsychiatry translated into English for the first time. Beginning with basic concepts about normal brain function the book moves to clinical topics dealing first with chronic mental disorders and paranoid states and then to the more complex area of acute mental disorders. Many of the featured topics are still clinically relevant and matters of contemporary debate. Carl Wernicke is one of the pioneers of neurology and psychiatry. Clinicians, researchers, and historians will find this of great interest.

Excerpt from Outlines of Lectures on the Neurological System of Anthropology as Discovered Demonstrated and Taught in 1841 and 1842 Vol 1 of 4 The work which I now lay before the public is correctly styled Outlines of Lectures It is an attempt to present in a concise manner the fundamental ideas of the System of Anthropology which I have taught in my lectures since 1842 and thus give to the reader a periscopic view of the science preparatory to publishing works of ampler dimensions upon its different departments in which the subjects might be more satisfactorily illustrated The concise plan necessarily adopted diminishes the fitness of the present work for popular circulation as it can be properly appreciated only by those who are interested in the study of man and who would avail themselves of the present work as a text book to be carefully studied The reader who hastily skims over pages expecting only to retain a few leading ideas or principles from a long chapter will find the present work not adapted to such hasty reading By delaying until 1854 the work which should have been published in 1842 I expect the advantage of a large and more appreciative circle of readers embracing many who ten years since would have turned aside with contemptuous incredulity from every wonderful fact in reference to the brain or the spiritual nature of man but on the other hand many of those ideas which I might have been the first to introduce to their notice have been received through other mediums and often inaccurately imparted The fact of the impressibility of the brain upon which rests the demonstration of a true and thorough Anthropology has been made quite familiar in Europe and America by Mesmeric operations in which my own discovery being entirely out of view the public have been familiarized with the fact that cerebral organs may be excited by Mesmeric procedures The legitimate reputation due to my priority of discovery was thus nearly lost by the notoriety of an analogous fact and the erroneous impression was substituted that all operations upon the organs of the brain were of that Phreno Mesmeric character which rendered them exclusively dependent upon the operator's will and independent of cerebral localities About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve
