**parametric resonance in systems with small dissipation** - Mar 16 2023

web jan 1 2001 all rights reserved the phenomenon of parametric resonance is observed in many physical systems one of  
the essential factors that determine the onset of resonance is energy dissipation in this paper it is assumed that the

dissipative forces and the amplitude of the periodic excitation are small

dissipation enhanced unidirectional transport in topological systems - May 06 2022

web nov 17 2023 dissipation is a common occurrence in real world systems and is generally considered to be detrimental to transport in this study we examine the transport properties of a narrow quantum anomalous hall system with dissipation applied on one edge when the fermi level resides within the hybridization gap we find that while transport is
