The Bible is a collection of sixty six books written by many different people over many hundreds of years All of its writers lived in an ancient world context and thought in ancient world ways But as Bible readers today we live and think in the modern world which is increasingly a postmodern world Things that were obvious to them are not obvious to us and vice versa For Christians who want to be faithful to the Bible as the Word of God the time and distance between then and now is a real challenge to navigate Stephen Burnhope suggests that we won't get it right by collapsing that gap by just picking the text up and reading it The Bible says insert a verse is not enough We will mishear both what the human authors were saying and what the divine author was saying Reading the Bible well starts from reading it with its writers understanding it as they understood it what they were saying why they said it and how they said it All of which is shaped and framed by the Bible's big

themes that once we're aware of them we see running throughout from cover to cover Revelation William C. Weinrich, Thomas C. Oden, 2005-12-09 The Revelation to John with its vivid images and portraits of conflict leading up to the formation of a new heaven and a new earth was widely read even as it was variously interpreted in the early church Drawing heavily on both Eastern and Western ancient commentators much appearing in English for the first time this ACCS volume is a treasure trove of early interpretation **Is There Theology in the Hebrew Bible?** Konrad Schmid, 2015-01-23 The Hebrew Bible has long been the subject of theological inquiries and debates in Judaism and Christianity But is there something like theology already in the Hebrew Bible itself Is it possible to describe the literary growth of the Hebrew Bible by means of an ongoing theological debate Answers to these questions depend on how one conceives of the category theology In this book Konrad Schmid reconstructs the development of this category then describes and discusses biblical texts in the Hebrew Bible that are relevant to the question Is There Theology in the Hebrew Bible The book consists of two main sections In the first Schmid traces the notion of theology from its earliest use in Greek philosophy through the medieval period and to today He pays close attention to biblical theology particularly the different understandings of this idea as something emanating from the Hebrew Bible itself versus something that readers impose onto the biblical text He also tracks the influence of the discipline of comparative religion on biblical theology especially with regard to the growing division between biblical and systematic theology In the second part Schmid focuses specifically on implicit biblical theology that is theological reflection apparent within the Hebrew Bible itself He provides several examples such as the theologization of the law that resulted from inner biblical exegesis and Jeremiah's universal theology of history Is There Theology in the Hebrew Bible will serve as an important reference to all those interested in the question posed by the title Schmid provides a nuanced answer to this question that both takes into account the convoluted history of biblical theology and lays out new ways of approaching the subject Christian Register and Boston Observer , 1928 **An Examination of Canon Liddon's Bampton Lectures.**
