Ove Arup And Partners Engineering The Built Environment:

Ingenieure Als Wegbereiter Der Architektur Degenhard Sommer, Herbert Stöcher, Lutz Weisser, 1994 **Peter Rice**

André Brown, 2001 Like his great predecessors whether Brunel or Brunelleschi Peter Rice is able to step outside the confines of his professional training transferring technical problems into practical solutions His design combines order with delight science with art Richard Rogers Known for his work on major projects such as the Centre Pompidou Sydney Opera House and Lloyd s Building Peter Rice received international acclaim as one of the great engineers of the 20th century His collaborations with some of the leading architects of our time including Renzo Piano Richard Rogers Frei Otto I M Pei Norman Foster and Bernard Tschumi have created memorable landmark structures which are justifiably famous for their style and innovation Rice believed that the role of engineering was to enable the most exciting pieces of architecture to be realised His collaborators came to learn that if anyone could make their ideas work it would be Peter Rice His adoption of a fresh approach for each project was calculated to produce the best possible building and was combined with a respect for the role of the architect Over time this method resulted in an inspirational body of innovative work This **Masted Structures**

in Architecture James Harris, Kevin Li, 2012-09-10 This is the first fully comprehensive survey and analysis of masted structures and covers examples that have evolved during the past three decades Masted Structures are one of the most interesting developments in post war architecture resulting from a combination of technology structural engineering theory and a collaboration between architects and engineers This is an essential guide for architects to the structural and constructional implications of masted forms in relation to space enclosure patterns of loading and use of differing materials and techniques This useful volume will enable architects and engineers to understand the origins development and nature of masted structures and will provide a stimulating basis for future design **Encyclopedia of Twentieth Century**

Architecture R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world s most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 Philosophy and Engineering:

Reflections on Practice, Principles and Process Diane P Michelfelder, Natasha McCarthy, David E. Goldberg, 2014-01-13 Building on the breakthrough text Philosophy and Engineering An Emerging Agenda this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering

methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines

Architecture and the Environment David Lloyd Jones, 1998 Green architecture has commonly been seen as separate from mainstream architecture and has been accorded the status of worthy but dull design David Lloyd Jones seeks to correct this judgement as he showcases 44 contemporary projects

Process: Architecture, 1992 **Portable Architecture** Robert Kronenburg, 2000 The purpose of this book is to show that portable buildings are eminently feasible capable of a wide range of roles and economic to build and operate They can also be subversive as well as sensitive amusing as well as appropriate energetic as well as economic This second edition includes work by two new design teams and seven new case studies to help further define the relevant characteristics of this important strand of contemporary building design The projects completed by the two new designers introduced in this edition have been included for very different reasons Architects Branson Coates designed Powerhouse UK a temporary British products design exhibition sponsored by the UK Department of Trade and Industry represents an establishment based endorsement of a portable building Festo KG's Airtecture hall uses inflatable technology and fundamentally could not be more different it was not reported in the main stream press yet it won many industrial design awards Designers included in the first edition have continued to exercise their skills on new projects that are progressions from their former work The nature of this book is that the case studies are primarily projects that have been taken to completion however it is of interest that several of the designers included here are currently involved in much more

ambitious projects The Millennium Dome is also discussed in the introduction as an example of large scale portable architecture and a high profile building in the UK Learn about the current and future developments in the field from the authority on portable architecture Understand the technology behind high profile projects such as the Millennium Dome and Festo Exhibition Centre Highly illustrated to give you full coverage of all the technical aspects in detail **Sustainable Construction** Jeff R. Kersey, 2004 This book describes the trialling of a set of KPIs for sustainable construction and distils the lessons learned to enable their dissemination to the wider industry *Highways and Transportation*, 1995
