Committee on Commerce, 1972 Noise Thinks the Anthropocene Aaron Zwintscher, 2019-02-12 In an increasingly technologized and connected world it seems as if noise must be increasing Noise however is a complicated term with a complicated history Noise can be traced through structures of power theories of knowledge communication and scientific practice as well as through questions of art sound and music Thus rather than assume that it must be increasing this work has focused on better understanding the various ways that noise is defined what that noise can do and how we can use noise as a strategically political tactic Noise Thinks the Anthropocene is a textual experiment in noise poetics that uses the growing body of research into noise as source material It is an experiment in that it results from indeterminate means alternative grammar and experimental thinking The outcome was not predetermined It uses noise to explain elucidate and evoke akin to other poetic forms within the textual milieu in a manner that seeks to be less determinate and more improvisational than conventional writing Noise Thinks the Anthropocene argues that noise poetics is a necessary form for addressing political inequality coexistence with the nonhuman other the ecological crisis and sustainability because it approaches these issues as a system of interconnected fragments and excesses and thus has the potential to reach or envision solutions in novel ways
