## Out Of Huawei:

*Four Internets* Kieron O'Hara, Wendy Hall, 2021 Four Internets offers a revelatory new approach for conceptualizing the Internet and understanding the sometimes rival values that drive its governance and stability. It unravels how tensions between the models play out across politics, economics and technology, ultimately debating whether these models can continue to co-exist or what might happen if any fall away.

*The China Paradox* Paul G. Clifford, 2021-12-06 In *The China Paradox* At the Front Line of Economic Transformation Harvard University based historian of modern China and business strategist Dr Paul G Clifford documents the twists and turns of China's dramatic and unforeseen rise over the last four decades. He sheds light on the delicate and fragile balance of forces at the heart of the success of China's hybrid model, explaining how the ruling Communist Party boldly led the nation's economic reforms as the surest way to preserve its grip on political power. Five years after this book was first published much has changed within China and in its relationship with the world. This second edition provides extensive fresh new material. It explains how China has raised its game moving from a catch up mode to technological innovation in some areas while still languishing in technology dependence in other respects. Earlier China had shown signs that its driving spirit was faltering with its sails flapping. Under Xi Jinping renewed energy has been injected. But at the same time Xi and his party have strongly reinforced their control across society and the economy, posing the question of whether Xi's New Era in fact marks a retreat from the reforms. This second edition contains two new chapters. One profiles Huawei a national champion in advanced technology. Another focuses on China's frictions with the world which have been fueled by a perception that its technology progress threatens US global dominance coupled with China's human rights record. In addition against a background of the challenges faced by Alibaba and other firms there is analysis of this watershed in China's private sector's autonomy. There is also extensive new insight into Xi Jinping's rule. As it celebrates its 100th anniversary in 2021 the Chinese Communist Party displays strong optimism over its continued governance of China. But that should not mask the longer term risks to China's development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy.

*The Fragility of Responsibility* Giovanni De Grandis, Anne Blanchard, 2024-12-02 Attempts to steer research, innovation and business in desirable directions have failed to meet expectations. Corporate social responsibility (CSR) and responsible research and innovation (RRI) seem to be losing ground while the challenges they sought to address remain. Despite their shortcomings these concepts remind us of the need to take responsibility for what we as researchers and entrepreneurs bring into the world and to keep questioning the given framework. Drawing from the experience of the AFINO project a unique attempt to bring together RRI and CSR and to promote networks learning and skills building in Norway this book contextualises and explores the practical challenges of actualising responsible practices even in the propitious Norwegian context. Readers interested in RRI, CSR, transdisciplinarity and in the governance of research and innovation will find extensive information and insights about the challenges of

steering research and business practices towards desirable ends and how to address them *Asia-Europe Industrial Connectivity in Times of Crisis* Lucía Morales, Sam Dzever, Robert Taylor, 2023-02-07 The main objective of this book is to offer an overview and a critical assessment of current connectivity issues in Asia and Europe seen from an industrial perspective. Critical insights into the contemporary debate on connectivity during times of crisis which has led to significant economic and social disruptions are offered throughout the book. European and Asian countries seek to bounce forward and not bounce back as they navigate the complex economic recovery process. Innovation and investment emerge as critical players to help an economic recovery that shifts towards a more resilient and environmentally friendly approach to ensure that the world economies stay connected. The global health crisis has revealed that more than ever before ubiquitous connectivity underpinned by pioneering innovation is a must. As such, governments worldwide need to ensure that businesses and societies emerge stronger and more resilient from existing and emerging crises by laying solid foundations that help to circumnavigate future disruptions of a global magnitude

#### Critical Risks of Different Economic Sectors Dmitry Chernov, Didier Sornette, 2019-12-03

This book explores the major differences between the kinds of risk encountered in different sectors of industry production including agriculture and services and identifies the main features of accidents within different industries. Because of these differences unique risk mitigation measures will need to be implemented in one industry that cannot be implemented in another leading to large managerial differences between these broad economic sectors. Based on the analysis of more than 500 disasters, accidents and incidents around 230 cases from the production sector and around 280 cases from the service sector the authors compare the risk response actions appropriate within different sectors and establish when and how it is possible to generalize the experience of dealing with risks in any given industry to a wider field of economic activity. This book is mainly intended for executives, strategists, senior risk managers of enterprise wide organizations and risk management experts engaged in academic or consulting work. By setting out clearly the sector differences in risk management the authors aim to improve the practice of general risk assessment with regard to identifying and prioritizing risks and of risk control with regard to planning appropriate mitigation measures

#### 中国经济人物辞典

Wenxian Zhang, Ilan Alon, 2009 This exhaustive resource provides comprehensive coverage of the major players in the Chinese economy since the reform era which began in 1978. It includes 200 entries briefly summarizing each individual's life and career with a central focus on his or her accomplishments and the key roles played in the economic development of China. The emphasis of the book is on the movers and shakers of China's new economy highlighting notable figures from both the initial economic liberalization period and the renewed growth from the early 1990s to the present time. This invaluable dictionary is the result of collaborative efforts across the globe. Over forty scholars from the United States, mainland China and Taiwan, United Kingdom, Germany, France, Norway, Israel, and Malaysia contributed. They cover the full spectrum of Chinese industries from banking, finance and investment, real estate, transportation and infrastructure to manufacturing.
