Outdoor Museums:

Museums in Motion Edward P. Alexander, Mary Alexander, 2008 In 1979 Edward P. Alexander's *Museums in Motion* was hailed as a much needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society, it served as an essential resource for those seeking to enter the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now Mary Alexander has produced a newly revised edition of the classic text, bringing it to the twenty-first century with coverage of emerging trends, resources, and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in-person visits.

Outdoor Museums Richard W. E. Perrin, 1975 *Plantations and Outdoor Museums in America's Historic South* Gerald Lee Gutek, Patricia Gutek, 1996 The writers of this travel guide seek to introduce the reader to the pleasures of exploring historic America, in particular the preserved and restored plantations and museum villages of the Southern landscape. The book covers 68 such sites with directions, opening times, and entrance fees.

Open Air Museums Sten Rentzhog, 2007

The Outdoor Museum Marcy Heller Fisher, 2001 Marshall M. Fredericks's sculptures can be seen in public places throughout the world, but it is in Michigan, where he lived for sixty years, that his legacy shines. Although his name is unknown to many people, a work such as *The Spirit of Detroit* is instantly recognized and loved by millions. This delightful book follows a young girl named Abby who is captivated by the sculptures she sees around Detroit: bronze pterodactyls, soaring humans, bears, clowns, and more. How could anyone be in charge of decorating a whole city, she wonders. With so many marvelous sculptures, it takes the determination of a curious child to discover them and learn how they were made. *The Outdoor Museum* is a guide to finding and appreciating hundreds of sculptures around the Great Lakes that were created by Marshall M. Fredericks, an invitation to the region's residents and visitors to discover the private world of public art.

The Museum Michael S. Shapiro, 1990-07-24 This critical bibliography of museum studies comprises an organized collection of essays on the various types of museums: art, natural history, history, science, and technology, and folk, and on general aspects: collections, education, exhibitions, etc., that cut across the media. Most of the essays are cogent, substantial, if not comprehensive, and clear. The editor has taken care to see that they follow a similar format: historical essay followed by a full bibliography of items discussed.

Library Journal As the number of museums in the United States has grown to more than 6500 in this century, the museum profession has experienced similar growth. In addition to academic training and accreditation programs in the field, an expanding body of literature on museum history, philosophy, and functions has evolved, little of which has received the critical attention it deserves. This reference volume serves as an up-to-date guide to this wealth of literature, identifying and evaluating works that introduce the general reader, the museum studies student, and the beginning professional to the history, philosophy, and functions of museums. The volume presents a series of

informative historical outlines and critical bibliographic essays on all aspects of museum history philosophy and functions Contributors treat such subjects as art museums natural history museums science and technology museums history museums collections exhibition education and interpretation and the public and museums Each chapter consists of an introductory historical narrative a survey of sources and a bibliographic checklist that contains cited and additional sources A set of appendices include a geographically organized bibliography of museum directories a guide to archives and special collections and a selective list of museum related periodicals The book concludes with a comprehensive general subject index This work will be an important reference tool for museum professionals and cultural historians as well as for courses in museum studies It will also be a valuable addition to both academic and public libraries
