The kids think it's entertainment while teachers and parents think it's a great lesson about the Arctic. This book combines singing, counting, and full body action with terrific cut paper illustrations that kids will want to imitate. Over in the Arctic the snow goose honks and the wolf howls. Children too will joyfully honk and howl while they count the baby animals and sing to the tune of Over in the Meadow. And they'll hunt for hidden animals on each page. A big plus for educators are several pages of extension ideas for curriculum and art projects as well as resources on the web and elsewhere. Global Warring Cleo

Paskal, 2010-01-05 In a perfect storm the environment, the global economic system and geopolitics are all undergoing rapid uncontrolled change. In the same way that the climate is in a state of flux exhibiting erratic behavior before settling into a new norm in the wake of the global economic crisis many of the assumptions about the Western economic system have been destroyed which leads to some troubling questions. How aggressive will water hungry China become in order to secure a sufficient supply of it? What will happen when climate triggered conflicts like the one in Sudan spread throughout the continent? As India takes its proper place at the high table of nations and begins large scale importing of food what will happen to already shrinking supplies? Global Warring takes a hard look at these questions. Journalist and analyst Cleo Paskal identifies problem areas that are most likely to start wars, destroy economies and create failed states. Examining the most likely environmental change scenarios she illuminates the ways in which they could radically alter human existence. A fascinating tour through our uncertain future. Global Warring also offers a controversial new way forward for the global economy and the worldwide environmental crisis. **The Eclectic Magazine of Foreign Literature, Science, and Art**

While Canada, China, Russia and the United States increasingly send icebreakers, submarines and other vessels to the Arctic, the ice itself continues to recede. Trade routes that kings and explorers have sought after for centuries are opening for the first time in human history offering greater opportunities for human traffic, cultural exchange, science, the extraction of resources and the transfer of goods from Asia to North America and Europe. With more Arctic land mass than any other country apart from Russia, Canada is a major player in the region, eagerly defending its sovereignty over its vast Arctic Archipelago. **The Mid-Pacific Magazine**, 1928
