recommendation algorithm is powered by a wealth of data about users preferences creating a personalized experience for each user

### How Data Shapes Music Preferences

Data collection goes beyond just choosing songs Spotify monitors listening time playlist engagement repeat tracks and even the times when a user is most likely to listen to a certain style of music This data is then processed to create a detailed profile of each user helping the platform predict which songs are most likely to appeal to them

**Practical example** Imagine that you are a fan of pop music and frequently listen to the most popular tracks on the charts Spotify by noticing this pattern can recommend similar songs that are starting to gain popularity or even songs by emerging artists in the same style influencing your musical tastes before you have even heard of them

### **You Have Not Yet Heard Your Favourite Song**

Glenn McDonald, 2024-06-20

If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here

Joseph Menn Washington Post writer

For the first time in history almost every song ever recorded is available instantly Everywhere

This book charts what music's dazzling digital revolution really means for fans and artists

As a former data guru at the world's biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star

Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of ruse in Norway to Christmas in the Philippines

Statistically you have not yet heard your lifetime's favourite song This book will take you on a voyage of discovery through music's fast flowing new waters 10 bonus playlists of wonder included

**About the Author** Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s

Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible

He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify

He became Spotify's Data Alchemist

His website Every Noise at Once [everynoise.com](https://www.everynoise.com) is an unprecedented computational map of the world's music genres

**Reviews** If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here

And you will be highly entertained and amused in the process

Joseph Menn Washington Post staff writer and author of *All the Rage* The Rise and Fall of Shawn Fanning's Napster

We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed

In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage

Will Page author of *Pivot* and former Chief Economist of Spotify

I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying

It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning

It's a history of the streaming era written by

someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Netzwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business long before streaming happened Back when charts were based on people reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardry Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy So you might have thought that fraud wouldn't be a big issue in streaming Buy the book and carry on reading [Spotify, Music for Everyone](#) 50minutes, 2017-11-03 Find out how Spotify changed the way we listen to music in just 50 minutes Spotify is a music streaming service which was launched in 2008 Its freemium business model which allows users to choose between listening to music for free or paying a monthly subscription to access an ad free version of the site has attracted 140 million active users of whom 60 million are paying subscribers to the site and has generated billions of dollars in revenue although the site continues operating at a net loss and has drawn heavy criticism from other major players in the music industry In this concise and accessible guide you will find out how Spotify revolutionised music lovers listening habits and discover how other key players in the music industry are reacting to this change In 50 minutes you will Learn about Spotify's history from its launch in 2008 right up to the present day Understand the site's freemium business model Discover how the rise of streaming has affected the music industry ABOUT 50MINUTES BUSINESS STORIES The Business Stories series from the 50Minutes collection provides the tools to quickly understand the innovative companies that have shaped the modern business world Our publications will give you contextual
