Saving the Mail R. Richard Geddes, Rick Geddes, 2003 A comprehensive overview of the U S Postal Service its organization and its performance since its creation by the 1970 Postal Reorganization Act **Saving the Royal Mail's universal postal service in the digital age** Richard Hooper, Great Britain Department for Business, Innovation and Skills, 2010-09-10 The Coalition Government asked Richard Hooper to update the 2008 report Modernise or decline policies to maintain the universal postal service in the United Kingdom Cm 7529 2008 ISBN 9780101752923 He finds the universal postal service still under serious threat with most of the original causes for concern having got worse the market and Royal Mail's market share continue to decline the company has still not modernised sufficiently the accounting pension deficit has grown from 2.9bn to 8.0bn the current regulatory regime is not fit for purpose The 2008 recommendation that private sector capital is required by Royal Mail is reiterated for several reasons The company is unlikely to generate sufficient cash to finance the modernisation required Private sector capital will inject private sector disciplines and reduce the risk of political intervention in commercial decisions And the state of the public finances means that Royal Mail will find it harder to compete for Government capital against other public spending priorities But private capital will not be attracted without action on the pension deficit and the regulatory regime The historic pension deficit should be taken over by the public purse A new regulatory framework must be created that increases certainty for investors in the postal services sector in general and in Royal Mail in particular Postcomm has recently consulted on a new framework and this should be built upon This update sets out the high level principles that should guide regulation ensuring the overall burden is reduced Action of the governors under 39 U.S.C., section 3625, and supporting record in the matter of postal rate and fee increases, 1971 United States. Postal Rate Commission, 1972 *Postal Rate and Fee Increases, 1973: Opinion and recommended decision* United States. Postal Rate Commission, 1975 Rerouting the Mail Edward Iacobucci, 2007 For example while the transmission and distribution systems of electricity and gas are true natural monopolies competition is feasible in the generation of electricity and the production of gas and the retailing thereof The strategy is thus likely to enhance competition in hitherto protected and unprotected segments of the sector to the benefit of users of mail services in both classes Failure to rethink the role and mandate of Canada Post given the dramatic technological transformation that is occurring in the communications sector would be in the words of Geddes 2003 commenting on the US Postal Service to acquiesce in a slow motion train wreck Lessons From Other Countries We turn to postal reform in other countries under the following themes the ownership effect The Ownership Effect In the international arena the approaches to ownership include maintaining the status quo where the post office is a government department or has no commercial objectives corporatization where the post office becomes a government owned corporation with commercial objectives and privatization where the post office is sold and no longer controlled by government Further it is designated a limited liability company to ensure that government does not underwrite

the Post's performance and that the board of directors places the interests of the business first ahead of the government's interest The Postal Laws and Regulations United States,1902 **Opinion and Recommended Decision** United States. Postal Rate Commission,1975 Monopoly Mail Douglas Adie,2017-09-29 First class postage rates have risen from six cents in 1971 to 25 cents in 1988 This rapid increase might be justifiable if service had improved commensurately but in fact postal service has steadily deteriorated The Postal Service concedes that it takes ten percent longer to deliver a first class letter than it did in the 1960s and one recent postmaster general admits that delivery may have been more reliable in the 1920s In this volume Adie reviews the failures of the U S Postal Service an inability to innovate soaring labor costs huge deficits chronic inefficiency and declining service standards He blames most of these problems on the postal service's monopoly status Competition produces efficiency and innovation monopoly breeds inefficiency high costs and stagnation He also examines the experiences of other countries and other industries that may be valuable in prescribing reform for the postal service The breakup of AT T provides lessons that may be applied to postal reform The long run effects of deregulation on the airline industry are also examined Since the postal service has serious union problems Adie looks at the air traffic controllers strike and other evidence on pay and labor relations in government unions Finally Adie examines the experiences of Canada and Great Britain with privatization of government companies He then offers a comprehensive and controversial reform plan for the U S Postal Service with no further monopoly privileges or taxpayer subsidies He argues that private companies should be free to compete with the Postal Service and it in turn should be free to compete in all phases of the communications business Without privatization and deregulation the Postal Service is doomed to continuing inefficiency rising costs worsening labor relations and an increasing loss of customers to more innovative and efficient service providers Competition would give the Postal Service a chance to enter the 21st ce **Post Office Appropriation Bill, 1917** United States.
