*Mastering Resistance* Carol M. Anderson, Susan Stewart, 1983 *Mastering Resistance* Carol M. Anderson, Susan Stewart, 1983-02-09 Resistance any attitude or behavior of the therapist patient or system that resists change is integral to every therapeutic relationship Family therapists are all too familiar with challenges to their professional credentials families reluctance to convene for treatment cancellations rejection of therapy requests to exclude a family member and numerous other maneuvers that frustrate therapeutic goals Mastering Resistance presents concrete accessible strategies for coping directly with specific commonly encountered problems of resistance Moreover it demonstrates how resistance can effectively be used to foster a stronger therapist client alliance *Handbook of Psychotherapies with Children and Families* Sandra W. Russ, Thomas H. Ollendick, 1999-10-31 This handbook presents a comprehensive overview of the current array of intervention approaches in the child mental health field Its coverage reflects current trends of intervention with specific problems and populations empirical support of the approach and the integration of treatment approaches proceeding from global presentations of basic theoretical approaches to applications with specific problems and populations Unique features are its focus on future directions for research and clinical practice a structured format across diverse interventions with a focus on empirical validation and interventions that integrate different theoretical components

**Handbook of Behavioural Family Therapy** Ian Falloon, 2015-07-30 First published in 1988 behavioural family therapists worked in an area that had greatly changed since its inception over 20 years before Growing out of the pioneering work of Gerald Patterson Robert Paul Liberman and Richard Stuart whose backgrounds vary from psychology to psychiatry to social work behavioural family therapy BFT had evolved to encompass systems theory considerations of the therapeutic alliance as well as approaches to accounting for and restructuring family members subjective experiences through cognitive strategies As BFT had not been the brain child of any one charismatic innovator but rather of a wide array of clinicians and researchers developing and rigorously testing hypotheses it is fitting that this much needed summation of the field was a collaborative product of an array of well established practitioners of the time They discuss in Part 1 of the book the theoretical parameters of BFT focusing on modular behavioural strategies the indications for therapy assessment of family problems pertinent issues arising in clinical practice and approaches to the problem of resistance to change Contributors to Part 2 then apply theory to such clinical situations as parent training and helping families cope with patients suffering from developmental disabilities alcoholism schizophrenia senile dementia as well as anxiety obsessive compulsive and depressive disorders Specific attention is also given to acute inpatient and primary health care settings While BFT had already proved quite effective in treating a great number of family problems it was only in its infancy at the time of writing As Falloon says in his overview all exponents of the method are constantly involved with the process of refinement each clinician is a researcher each family member is a research subject and each researcher is contributing to clinical advancement This openness in combination with a

willingness to modify sacred tenets of behaviourism while adapting proven techniques from other family therapies made this title a landmark in its field As such it was not only of interest to all clinicians and researchers with a behavioural slant but also to all family therapists who wished to challenge themselves to develop an integrative approach ***Family Therapy*** Janice M. Rasheed,Mikal Nazir Rasheed,Mikal N. Rasheed,James A. Marley,2011 This text offers a straightforward comprehensive overview of both traditional and evolving theoretical models of family therapy and intervention techniques as well as a discussion of clinical issues unique to family therapy practice Aiming to prepare students to develop beginning proficiency in family therapy the authors outline major family therapy models in detail including a step by step description of concepts theories skills and techniques as well as a history of each model and its conceptual and theoretical underpinnings The text also provides extensive case illustrations of family interviews that identify the specific stages clinical issues concepts theories and techniques associated with each model This core text is designed for graduate level courses such as Family Therapy Marriage and Family Therapy Marriage and Family Counseling Family Systems Theory and Family Counseling in departments of social work psychology nursing education or human services ***Self In The System*** Michael P.

Nichols,2013-10-28 First published in 1988 This thought provoking volume offers a constructive critical analysis of family therapy for its neglect of the self in the system and provides a therapeutic approach to clinical problems that takes into account both individual and family dynamics The author shows that by elevating the metaphor of the system to dogma family therapy has lost sight of much of the richness and complicating influence of personal feeling motivation and conflict resulting in a proliferation of esoteric abstract theories and highly mechanistic technical interventions ***The Self in the System*** describes a different reality that is often overlooked no matter how much their behavior is coordinated within the system family members remain separate individuals with private hopes and ambitions motives and expectations quirks and foibles and potentials for creative work This book provides a unique approach that develops a better understanding of family members individual experiences and helps in enhancing their personal responsibility and ability to solve their own interactional problems within the family system The approach however is not just another version of psychoanalytic family therapy but rather one that utilizes the best tools of family therapy and the most useful ideas from individual psychology and psychodynamic psychotherapy Chapters cover such important topics as finding the family and losing the self the problem of change working with interaction the effective use of empathy making assessments that include both the whole family system and the psychology of its members interactional psychodynamics a practical guide to object relations theory how to develop understanding and working with resistance ***Addiction Counseling*** Alan Cavaiola,Amanda L.
