Mate Relationship:

The Mate Relationship Anne Maydan Nicotera, 1997-10-02 This book presents research applications of a rules theory of mate relationships of several American cultures and two non American cultures The theory is summarized in seven basic propositions several of which have been previously tested and supported The research contained here expands the depth of the work by examining attributes and levels of mateship in several American co cultures one Caribbean culture and one Asian culture and extends the breadth of the work by moving into the areas of relational quality maintenance and conflict Seven propositions presented are 1 perceived self concept support is the basis of interpersonal attraction 2 different types of perceived self concept support are the basis for different types of interpersonal relationships 3 different types of self concept support are the basis for entry into and increasing intensity of interpersonal relationships 4 the type and form of self concept support is homogeneous by culture 5 conflict which threatens self concept support on crucial relationship variables the lack of it or attacks on it is the most potentially dangerous type of conflict in interpersonal relationships 6 negotiation of differences in perceptions of self concept support on crucial relationship variables cements interpersonal relationships and 7 quality interpersonal relationships consist of intimacy personal growth and effective communication on the crucial relationship variables **Communication in Interpersonal Relationships** Donald P. Cushman, Dudley D.

Cahn, 1985-01-01 This book discusses communication principles processes and skills from four different perspectives by explaining four related propositions First human communication is guided by socially established rules the knowledge of which allows interacting persons to exert influence over the outcome of their interactions Second self concepts are formed and sustained in our interactions with others Third the formation of sustained interpersonal relations depends upon the attraction resulting from reciprocal self concept support And fourth organizations and the cultural system provide the parameters within which self concepts and interpersonal relations are formed The implications of these propositions are examined in chapters two through ten The authors develop their system in terms of results What patterns of communication what patterns of signal exchange increase the probability of the development of affective relationship What patterns erode interpersonal systems or prevent them from forming The book also examines patterns of communication within task oriented organizations and in situations involving cultural differences **Human Communication as a Field of Study** Sarah

Sanderson King, 1989-01-01 Authors analyze and discuss significant theories research and practices in various areas of this field The final section considers future directions Seventeen essays on the history of the field communication theory in business and cultural contexts and future directions Paper edition unseen 18 95 Annotation copyrighted by Book News Inc Portland OR **Building Communication Theories** Fred L. Casmir, 2013-10-16 Concern with various matters related to humans as they communicate has led to an increase in both research and theorizing during the second half of the 20th century As a matter of fact so many scholars and so many disciplines have become involved in this process that it is virtually

impossible to understand and appreciate all that has been accomplished so far This book focuses on one important aspect of human sense making theory building and strives to clarify the thesis that theories do not develop in some sort of social intellectual or cultural vacuum They are necessarily the products of specific times insights and mindsets Theories dealing with the process of communication or communicating are tied to socio cultural value systems and historic factors that influence individuals in ways often inadequately understood by those who use them The process orientation of this book inevitably leads to an emphasis on the perceptions of human beings Thus the focus shifts from the subject or area called communication to the act of communicating Finally this volume offers insight into how the process of human sense making has evolved in those academic fields commonly identified as communication rhetoric speech communication or speech within specific socio cultural settings
